CARD CLOTHING
Of Every Description, LOWELL, MASS.

TEXTILE MACHINERY.

THE BRIDESBURG MANUFACTURING CO.

MACHINE BUILDERS,

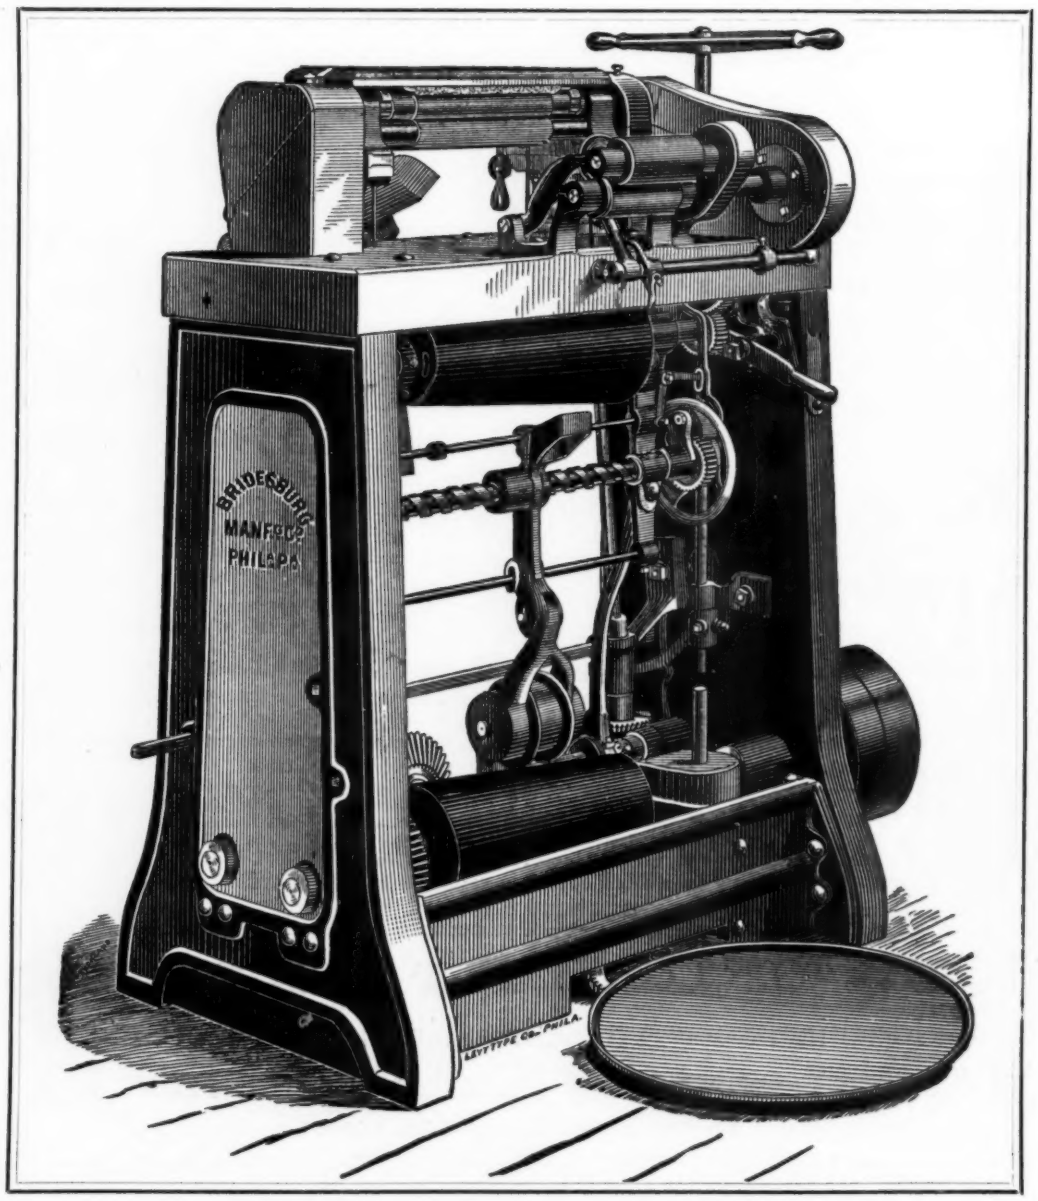
OFFICES, No. 201 CHESTNUT ST., PHILADELPHIA.

CARDING, SPINNING, WEAVING,

And all other Machinery used in Cotton and Woolen Factories.

—ALSO—

Builders of the Foss & Pevey Under-Flat and All-Iron Roller Cards.



POWER-SAVING RING SPINNING,

With Excelsior, Sawyer, Rabbeth, Birkinhead, or any of the approved Patented Spindles. The Excelsior Spindle drives the Bobbin positively and will run at any required velocity.

Self-Acting Mules for Wool,

All recent additions and improvements.

LOOMS

For Cotton, Jean, and Worsted Goods, and recently improved and superior *Drop-box Looms*, with patent full lift and full drop, skip-box motion and parallel pick, for Ginghams and Dress Goods.

STOCKTON BATES, President. JOHN ROMMEL, Jr., Vice-President. JOHN ROMMEL, 3d, Secretary and Treasurer.

☞ *Estimates for Mills and Plans for same, with all details, furnished by the best Mill Engineers, at reasonable prices.* ☜

LOWELL MACHINE SHOP,

LOWELL, MASS.

BUILDERS OF

COTTON MACHINERY

OF EVERY DESCRIPTION.

Lappers, Cards, Top Grinders, Lap Winders, Railway Heads, Drawing Frames.

LOWELL SPEEDERS OR ROVING FRAMES,

Fly Frames, Ring Spinning Frames, Filling Winders, Spoolers, Warpers, Twisters, Reels.

SELF-ACTING MULES.

Cylinder Slashers. **L. M. S. Patent Hot-Air Slashers.**

LOOMS

ELEVATORS, SHEARING MACHINES, BRUSHING MACHINES, SEWING MACHINES, CLOTH FOLDERS, CLOTH-STAMPING MACHINES, SIZE KETTLES, SIZE PUMPS, INDIGO GRINDERS, DRAWING-IN FRAMES, SHAFTING and GEARING.

☞Plans and Estimates Furnished on Application. ☞Correspondence Solicited.

Manufacturers of

COTTON ✠ MACHINERY

OF THE MOST IMPROVED PATTERNS.

CARDS,

Cylinders, 36x36 and 36x30, with 20 tops and Self-Strippers and Railway Troughs. Union Cards, with workers, strippers and tops.

FINISHER RAILWAY HEADS.

DRAWING FRAMES, ANY LENGTH, WITH 3, 4 AND 5 LINES OF STEEL ROLLERS.

English Slubbers and Fly Frames, With Long or Short Bolsters.

BOBBINS—12x6, 11x5½, 10x5, 9x4½, 8x4, 7x3½, 6x3, and 5x2½.

RING SPINNING FRAMES, 2, 1¾, 1⅝ AND 1½ INCH RINGS.

TWISTERS.

SELF-ACTING MULES, Parr, Sharp and Roberts' and Higgins' Pattern,

1⅝, 1 5-16, and 1¼-inch Gauge.

S. W. RICHARDSON, Treasurer,
No. 1 Simmons Building, Boston.

JAS. H. McMULLAN, Agent,
Biddeford, Maine.

ADJUSTABLE SELF-OILING HANGER.

FAIRMOUNT MACHINE WORKS.
Office, 2106 Wood St., Philadelphia.

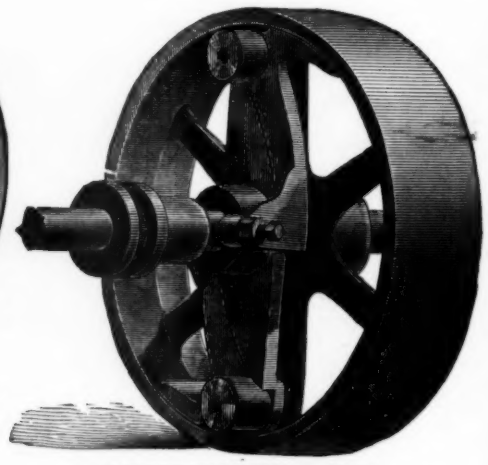
THOMAS WOOD,
Manufacture as Specialties

Power Looms, Patent Bobbin or Quill Winding Machines, Plain and Presser Heaming Machines, Plain and Press-er Warp Spooling Machines, Reeling, Warp Splitting, Dyeing, Sizing, Scouring, Fulling and Calendering Machines,

WARPING MILLS,
16, 18 and 20 yards Circumference,
WITH IMPROVED HECKS.

SHAFTING,
With Patent
ADJUSTABLE SELF-OILING HANGERS,
8, 10, 12, 15, 18, 20, 24 and 30 in. drop.
Also WALL, POST AND GIRDER HANGERS.
Pulleys, from 4 inches to 10 feet in diameter.
PATENT FRICTION PULLEY.
Pulleys in two parts, any size required.
PATENT HOISTING MACHINES.
Oil Presses for Lard, Fish and Paraffine.

PULLEY IN TWO PARTS

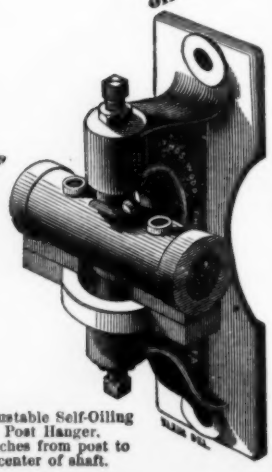


PATENT FRICTION PULLEY.
Simple, reliable and very durable. Suitable for any kind of driving, they serve equally well as driver or driven.

Ball and Socket Self-Oiling Pillow Block.

Special Driving,
such as Angular, Muley, and Gallows Driving, furnished for any position where possible to transmit power by belts.
PULLEYS from 4 inches to 10 feet in diameter.

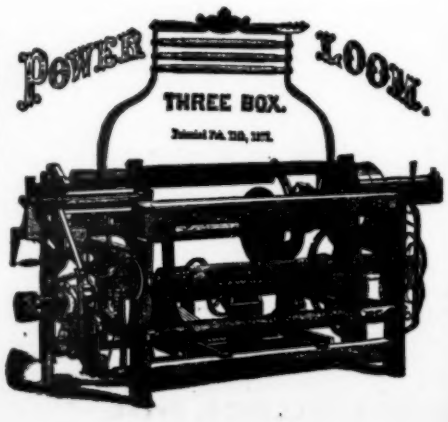
DOUBLE-BRACED ADJUSTABLE SELF OILING HANGER.



Adjustable Self-Oiling Post Hanger, 6 inches from post to center of shaft.

Why use old style Bearings, that require oiling every day, when you can get Bearings at less cost that only require oiling once in Six Months, and thus save oil and labor enough to pay for the bearings in use. Test the matter for yourselves; a trial always secures the trade.

ADDRESS,
THOS. WOOD,
Office, 2106 Wood St.
PHILADELPHIA, PENNA., U. S. A.



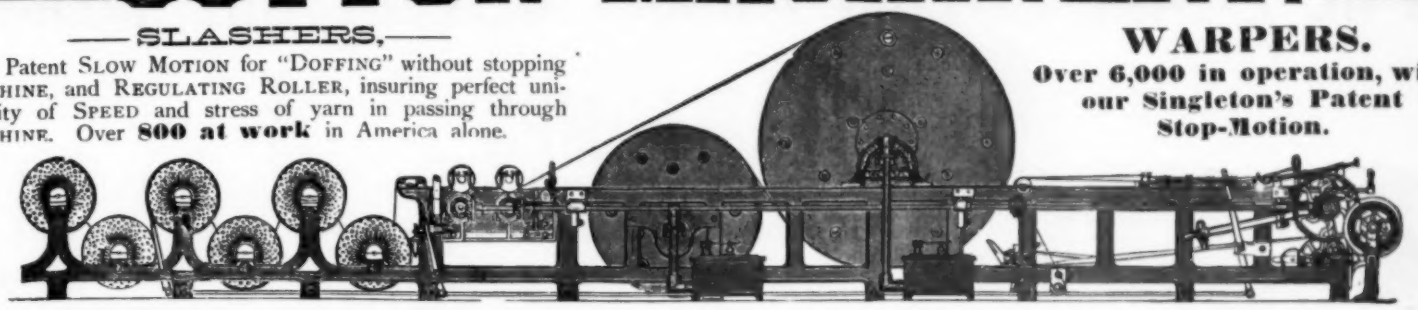
COTTON MACHINERY.

SLASHERS,

with Patent SLOW MOTION for "DOFFING" without stopping MACHINE, and REGULATING ROLLER, insuring perfect uniformity of SPEED and stress of yarn in passing through MACHINE. Over **800 at work** in America alone.

WARPERS.

Over 6,000 in operation, with our Singleton's Patent Stop-Motion.



SPECIALTIES—Openers and Lappers, Cards, Drawing, Slubbing, Intermediate and Roving Frames, Patent Electric Stop-Motion, already applied to near **8,000** delivery heads of Drawing, and **50,000** Intermediate Spindles for preventing "Single;" Ring Spinning and Twisting Frames, the latest and best improvements; Self-acting Cotton and Woolen Mules; Patent Revolving and Traversing Yarn-Beam Pressers for Slashers; Card Clothing, in Leather, Rubber and Cotton; Spindles, Flyers and Fluted Rolls, Looms, etc., etc.

HOWARD, BULLOUGH & RILEY,

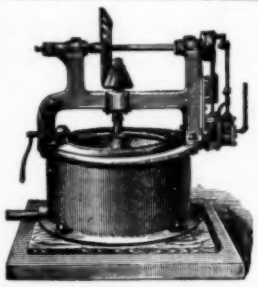
STEEL WIRE

A Specialty.

T. K. EARLE MANUF'G COMPANY,

Worcester, Mass.

Improved Centrifugal HYDRO-EXTRACTORS



Machine A.

For Silk Dyers, with Vertical Engine on the side and Cone Pulley Friction.

Machine B.

For Wool and Cotton Dyers, with direct-acting Steam Engine.

Machine C.

Runs by Belt and Friction Cones, suitable for water-power.

Three Sizes of Each Kind built by **W. P. UHLINCER,** Nos. 26 to 48 East Canal St., Philadelphia, Pa.

MOSHELEY'S CELEBRATED MOLLIS OIL.

It is a splendid lubricator for Stationary Engines, Printing Presses, Paper Mills, Saw Mills, Cotton and Woolen Mills, Spindles, &c. It is the *cheapest* and *best* Oil for Machinery, Harness, Belts, Boots and Leather generally. Warranted a Water-Proof Leather Preservative. It is penetrating, and renders soft and pliable the hardest leather.

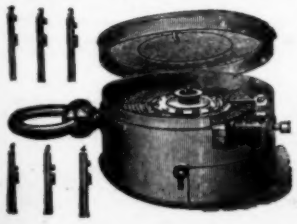
Fire-Proof, Barn, Fence, Bridge and Roof Paint

MIXED READY FOR USE.

Our Fire-Proof Barn, Fence, Roof and Bridge **PAINT** is unsurpassed for painting exposed surfaces, such as Tin, Iron or Wood Roofs, Wagons, Farm Implements, Fences, Barns, Cars, &c., &c. mixed ready for use, will not settle, will be found convenient, saving labor and time, and at the same time is handsome and durable. ☞ SOLD IN ALL-SIZED PACKAGES FROM 1 to 50 GALLONS.

Prices Mailed on Application. **HIRSHBERG, HOLLANDER & CO., 195, 197, 217 and 240 W. Pratt St., Baltimore.**

Buerk's Watchman's Time Detector.



IMPORTANT FOR ALL LARGE CORPORATIONS AND MANUFACTURING CONCERNS.

Capable of controlling with the utmost accuracy the motion of a watchman or patrolman as the same reaches different stations of his beat. The instrument is complete in itself, portable, and as reliable as the best lever watch. It requires no fixture or wires communicating from room to room, as is the case with ordinary watch clocks.

The Instrument will in all Cases be Warranted Perfect and Satisfactory.

P. O. Box 2470. **J. E. BUERK, Proprietor, No. 230 Washington St., BOSTON, MASS.**

BALTIMORE, JUNE 7, 1884.

Pig-Iron Making in the South.

Some weeks ago Mr. Samuel Noble, a successful iron maker of Anniston, Ala., reviewed the history of iron making in that State, showing that nearly all the coke furnaces in Alabama had failed and passed out of the hands of their original owners. Mr. Noble's letter, whether such was his intention or not, has been construed to mean that Alabama is not a profitable field for iron making. We think, however, that despite the record of many failures. pig iron can be produced very cheaply in that State, as well as in several other Southern States. The difference, however, in cost between pig iron in the South and in Pennsylvania is not probably as wide as some claim, nor is it sufficient to enable Southern furnaces to make large profits on iron shipped to consuming markets at a cost of $4 to $6 a ton freight. That there have been many failures counts for very little. Mr. M. F. Maury, of Cincinnati, in a letter to the Iron Age, says if the history of any iron district in America is examined, it will be found that its pioneer years are marked with as many wrecks as is Alabama, with perhaps the single exception of the Lake Superior charcoal furnace region. These failures are not so much due to any disadvantages of the locality as to lack of experienced management. The successful working of a small furnace is by no means a guarantee of ability to properly manage a large one.

In the South, as well as in other iron regions, during the first years of the development of the iron resources there was a remarkable disposition among capitalists totally unacquainted with the iron business to invest in furnaces. Often these furnaces were located by inexperienced men, only to discover after being built that their position was very bad as regards getting the raw material. The history of many furnaces will demonstrate the truth of this. Then some of them have been managed by men of no practical experience in iron making, and others by men who could run a five or ten-ton furnace, but had not the ability to operate one of 50 or 100 tons capacity. A close examination of the record of every Southern furnace that has failed would show that nearly all of their troubles were due to some one or more of these causes, and not to any inherent disadvantages of the South for making cheap iron.

The successful iron makers are very slow to give up an established business and move to new regions; but when they do so, they are very apt to look well to the advantages and disadvantages of location, as well as to see that their furnaces shall have the very best management in every department. The South had to pass through its pioneer days of misfortune in iron making, just as all other iron centres; but the advantages of that section for this industry are so great that a permanently successful business is sure to follow after it draws to it the proper experience and management.

As we have so often said in the past, there is, in our opinion, a greater need at the South now for more rolling mills, bridge works, and other consumers of pig iron, than for more pig iron producers. It is true that the amount of pig iron now produced in the South is scarcely one-half of the quantity used in making the finished iron and steel used in that section; but this metal is very much in the same condition that cotton formerly was. It is, in one sense, a raw material, like cotton; and, like cotton, it is shipped North to be turned into finished iron, and then returned to the South, paying heavy freights both ways. As the South is rapidly increasing its facilities for manufacturing cotton, so it must prepare to take its own pig iron and produce the finished goods needed. Mr. Maury, whom we have already quoted, says:

"Whenever railroads have connected Southern coal and iron, development thereof has rapidly followed. Thus, in Virginia there was not a single coke furnace in 1873, in which year railroads joined the coal and iron fields, and since when 11 furnaces have gone into blast In Tennessee there was no coke furnace in 1867; now there are 8. In Alabama the first one blew in in 1876, and now there are 10.—Here is the striking fact that prior to 1867 there was not a single coke furnace in these three States, and now there are 29, representing many million dollars original investment, and it is a fair conclusion to draw that the last 10 or 15 would not have been erected if the previous ones were all dead failures. * * *

On January 1, 1883, out of the 17 coke furnaces under construction in the United States 10 were in this "wrecking" belt in Virginia, Tennessee and Alabama, leaving only 7 for the other 21 iron-producing States of the Union. It must be borne in mind that iron declined all through 1882, and hence there must have been some good inducements for the South to have this preponderance in construction."

The New Orleans Exhibition.

From present indications the New Orleans Exhibition will be a magnificent success, surpassing the utmost expectations of those who first planned it. It has undoubtedly been managed thus far with consummate ability, and now that sufficient financial aid has been secured it can be pushed with still more vigor. We have already expressed our belief that in many respects this exhibition will surpass any other ever held,—even the great Centennial of 1876,—and the more closely we study the progress already made, the more fully are we convinced of this. The Centennial labored under the disadvantage of being unpopular in the beginning, and of having to contend to some extent with the jealousies of other cities. Moreover, the country was then still in the midst of the severe business depression which lasted from 1873 to 1879, and merchants and manufacturers were hardly in a position to enter willingly upon the preparation of expensive exhibits, and especially as that being the first world's fair ever held in this country they did not fully appreciate the benefits that would flow from it. Despite these drawbacks it was such a wonderful success that it was supposed to be the supreme effort of this great country in the exhibition line, and few looked for its equal in America during the present century at least.

New Orleans, however, is preparing to surpass that magnficent exhibition, and she has many advantages in her favor. The South is now attracting more attention in the industrial world than any other country either in America or in Europe; her marvellous resources are being developed as never before, and millions of dollars from the North, as well as from Europe, are being literally poured into that section, while immigration is rapidly increasing the population of the Southern States. The world stands ready, therefore, to more fully investigate the claims of the South as a place of business as well as a place of residence.

The New Orleans Exhibition will afford the best opportunity that could possibly be given for this. While it will be international in its scope, it will be especially an exponent of the vast resources and of the rapid progress of the South. More visitors will probably be attracted there for the one purpose of studying the South and the South's advantages than for all other objects combined, and on this account it is essentially important that the Southern States be fully represented. Every State in the South should do its utmost to present a complete and perfect exhibit of all its resources, and the State that makes the best display will assuredly reap the most abundant rewards. The South has never had such a chance to let the world know of its marvellous wealth, and many years must elapse ere another opportunity of this kind will be presented; so that it behooves her people to strain every effort to make an exhibit that will astonish the world—an exhibit that will bring untold millions of money and thousands and hundreds of thousands of immigrants to the sunny South.

Crops in the South.

Elsewhere in this issue we have given a few extracts from Southern papers, showing the condition of the wheat and oat crops in different parts of the South. The outlook, as indicated by these reports, points to the most abundant wheat crop ever gathered in the South, with a fairly good crop of oats, while of fruits and early vegetables the yield is also unusually large. It is true that from some few places in the South there are complaints, but we do not remember ever to have seen such remarkably favorably reports from nearly every section of the Southern States as are now coming in. We could readily fill an entire issue of the MANUFACTURERS' RECORD with extracts from Southern papers reporting the outlook for the early summer crops as unusually good, but give only enough to show their general drift.

It is yet too early to make any predictions as to the corn and cotton crops—the two most important items in Southern agriculture; but the outlook for them is, on the whole, we think, very satisfactory. The large early summer crops of wheat, oats, fruit, &c., will materially aid the farmers of the South, and will within a few weeks put quite a liberal amount of money into circulation, giving some impetus to business generally. Later on, should corn and cotton give fine yields, as there are good reasons for anticipating, the South would be in a very prosperous condition, and the industrial development of that section would make far more rapid progress than ever before. Last year's crops were unusually small in the South, and the farmers in that section not well fixed financially, but still we have seen a marvellous increase in the manufacturing interests of all the Southern States. If this has been done during a year of depression and of very short crops, what may we not expect if crops should be large this year?

THE Dayton Coal and Iron Co., of Dayton, Tenn., a company of very wealthy Englishmen, have commenced work on building two large furnaces at Dayton, mention of which we lately made. These furnaces are to have an aggregate capacity of over 70,000 tons of pig iron a year. They will be constructed in the very best manner.

THE decline in the price of locomotives is so great that an Eastern company, which a little over a year ago sold a certain kind at $15,000, has accepted an order for building ten exactly similar at $8,000 each.

How the South is Progressing.

SOUTHERN OFFICE
BALTIMORE MANUFACTURERS' RECORD,
ATLANTA, GA., May 26, 1884.

At home here we have no idea of the extent of industrial development that is going on among us. Men are building big manufacturing enterprises and saying nothing about them; creating them without word or aid; and we strike upon consummated projects stuck quietly off in some unheard-of locality that amaze us with their value and astound us with their existence.

Last Saturday I was thus astonished. Mr. Brady, of the firm of Miller & Brady, invited me to go to Foster's Mills on a picnic. The place used to be a grist mill—a country corn mill. I found a fine stately underwear factory just completed and in operation. It cost $40,000, and works 50 hands. It is the only knit underwear mill in the South, save one in the upper part of Virginia. It was built by two Georgia brothers named Foster, from Morgan county in this State, built entirely with their own capital, and is a model of its kind.

Mr Foster as a boy and youth spent some time in Cohoes, New York, and was there impressed with the neatness and methods of underwear mills there. The manufacturing idea is seizing our folks, and he got irresistibly into the current. He had means, and this splendid factory is the result. He has obtained his heads of labor from the Northern factories, but all the rest is home country labor picked up right here.

Mr. Foster has water power. He uses two bales of cotton a day and makes at full about 800 shirts and drawers a day of the best quality and all sizes. His shirts retail at $1 each. His $100 of raw material thus brings retail $800 of products. He has a contract for all the goods he can make, and his profit even with unskilled help is fine. His labor will run 50% cheaper than the same class of work at the North. His hands are daily improving. He has liberally enough paid them by the day while learning, and now when trained he pays them by the piece, thus allowing them to make as much as their rapidity and skill will allow.

This mill is a new departure and a successful project. It was a great surprise to light upon a blooming little village of 150 people, created like magic off at a cross roads grist mill in the woods. The work is very pleasant. There is none of the dust and clatter of the ordinary cotton mill, but the women sit in a large cool room and run their various machines in a leisurely and comfortable sort of way. The machines are very interesting. After the thread is made then the knitt ng machines turn out automatically the round rolls of body. The cutter cuts out the garments. The sewing machines sew up the arm and leg seams and bind the edges. The louper tacks together the cuffs and anklets to the arms and legs, and after the washing the patent ironer rapidly irons them.

This factory is a good specimen of how things are working with us. Here, without any blow, has sprung into operation as neat and compact a little factory as can be seen anywhere It is the conception of a Southern brain, built with Southern money on Southern soil, and operated with Southern labor, directed by a Southern intelligence. Such achievements carry their own lesson, and speak loudly of Southern progress.

Mr. Foster began work on his mill last June. In less than a year it is in operation and he is shipping to the North his heavy boxes of first-class goods. He is very proud of his little factory, and is making profits that delight him and that will steadily increase as his labor improves.

I. W. AVERY.

Crop Prospects in the South.

In the South, probably more than in any other section, the condition of business depends upon the crops. While the Southern people are rapidly turning their attention to manufactures, yet agriculture is still the greatest interest, and prosperity among the farmers means great activity in business. Should the South be blessed this year with large crops the latter part of 1884 and the early part of 1885 would witness probably the heaviest volume of trade ever done at the South. Much of this activity would show itself in new industrial enterprises, and we might safely count upon a remarkable addition to the South's manufacturing interests. Looking at the matter from this point of view, manufacturers, capitalists, machinery makers, &c., are all deeply interested in the crop prospects of the South. As we have previously said, the increase in the wheat acreage of the South this year is 750,000 acres compared with last year. As to the prospects for a large wheat yield, we take the following points from Southern papers:

The wheat crop is good and promises an abundant harvest.—*American*, Cartersville, Ga

Prospects of the wheat crop were never better in this section than at the present time.—*News*, Bristol, Tenn.

The crop prospect at this writing is splendid.—*Union*, Milledgeville, Ga.

Wheat is reported considerably above an average in this section. Crops generally are very promising.—Athens (Ga.) correspondent *Chronicle*, Augusta.

The wheat crop is excellent.—*Reporter*, Durham, N. C.

From all directions there promises to be a plentiful harvest of small grain. The crops of oats, rye and wheat are said to be luxuriant.—*Bud*, Clayton, N. C.

Crop prospects very flattering Wheat never looked more promising.—*Reporter*, Danbu.y, N. C.

Crops in adjoining counties, especially wheat and oats, are very fine—finer than for many years.—*Economist*, Elizabeth City, N. C.

Crops of all kinds looking splendid; said that there will be more wheat produced in this county than in five years—*Enquirer*, Monroe, N. C.

Crops around Scotland Neck reported in excellent condition, with more diversity of crops than for years past.—*News*, Roanoke, N. C.

Wheat in East Tennessee reported as in excellent condition, and the prospect for a large yield is the finest that has been at this time of the year for fifteen years.—*Banner*, Nashville, Tenn.

Outlook for good crops in this section for the coming year is very good.—*Mercury*, Farmville, Va.

The season up to the present time is one of the best ever known, and the indications point to unheard of crops It is altogether likely that the cotton and corn crops this year will be the largest ever known.—Columbia, S. C., correspondent *Constitution*, Atlanta, Ga.

Forsyth county will harvest one of the largest wheat crops known in her history.—*Sentinel*, Winston, N. C.

A more abundant crop of wheat was never harvested than is now turning golden in a thousand waving fields.—Another fortnight and the time of reaping will be upon us. Within a few days copious rains have fallen, proving a blessing to young cotton and corn at a time when most acceptable.—Correspondent *News and Courier*, Charleston, S. C.

The wheat prospects were never better.—*Press*, Salem, N. C.

From present indications there will be an exceptionally good yield of wheat and oats.—*Advance*, Canton, Ga.

On every hand one hears of the flattering prospect of the wheat and oat crops. They are simply in that condition known as booming.—*Herald*, Newberry, S. C.

Wheat is looking splendidly and will be ready to harvest in a few days.—Lexington, Ga., correspondent *Chronicle*, Augusta, Ga.

The wheat crop is unusually good in this section.—*Chronicle*, Charlottesville, Va.

Prospect for a wheat crop is better in Elbert county than for a number of years. *News*, Savannah, Ga.

We are aware of the fact that we have before mentioned the magnificent condition of the oat, rye and wheat crop, but it is really so fine that the telling of its condition will bear repetition.—*American*, Statesville, N. C.

North Georgia.

An Opening for Capitalists.

From the time of the earliest settlement of the United States we have heard of the "Sunny South;" the very name conveying to the mind of a Northern man visions of a beautiful land, where it is a perpetual spring, and life is made new again by a mild and healthful climate. Of late years the South has developed a new interest in the world, and is fast gaining a reputation for the wealth in her many hidden resources, so much so that the tide of immigration is fast heading its way south, and capital is seeking investment here as it flowed to the Pacific slope "in the days of '49."

Georgia is to-day the New England of the South, and is making rapid strides towards becoming one of the principal manufacturing centres of the continent.

She has superior commercial advantages to any State in the Union. She has the best of railroad connection with every section of the North and West. In the South she is at home. The finest harbors on the Atlantic coast are within her boundary.

The raw material of every kind and description are at her very doors, which to-day is being shipped to foreign factories, while the great water power of her rivers is wantonly allowed to run waste.

My attention has been specially called to one great power in particular, which, before the war and at the time Sherman's army spread desolation from Chattanooga to the sea, was in the heyday of its development, and over two thousand souls answered to the call of the pay-roll.

The property consists of over seventeen thousand acres of land, situated at the extreme southern end of the Blue Ridge Mountains, in Bartow and Cherokee counties, Georgia.

The beautiful Etawah River flows through the property for a distance of over four miles; in this distance there is a fall of over seventy feet in the bed of the river, furnishing four available water-powers, aggregating over eleven thousand six hundred horse, which can be made available at an expenditure of less than thirty thousand dollars. Much less than a fourth of this power has ever been utilized, and yet there has been upwards of two million dollars invested in manufacturing enterprises on this property. It may not be out of place here to give a brief summary of some of these enterprises, which were in successful operation before the war, and were at that time wiped out by the forces under Sherman, leaving nothing but the ruins and their massive walls in their picturesque desolation, bearing silent testimony of wealth and labor destroyed; a rebuke that it is still permitted to run waste.

There were at this time in successful operation three blast furnaces, each making from ten to twenty tons per day of fine charcoal iron; an extensive rolling mill for making merchant bar, boiler plate and railway iron; a large foundry for making all kinds of castings, from stove plate to pipe and heavy ordinance; one nail and spike mill; one merchant flouring mill having a capacity of two hundred and fifty barrels per day; two grist mills for corn; two saw and planing mills; one brewery; one woolen mill;—in fact, almost every branch of manufacturing industry was carried on here, for the raw material of every kind was close at hand.

There are in the property practically inexhaustible deposits of the finest quality of brown hematite and specular iron ores, and similar extensive deposits of manganese ores, quarries of the finest limestone, with direct communication by railroads to the coal fields of Georgia, Alabama and Tennessee. The land is mostly covered with a second growth of timber from twenty-five to thirty years old, which will furnish more charcoal to the acre than the original forest, and can be delivered at the furnace at five cents per bushel.

The property is within the cotton-growing belt of the Southern States, with railroad communication to every section, as well as being in one of the most fertile and productive agricultural sections of the State. It is but forty-two miles from Atlanta, ninety-two miles from Chattanooga, with numerous smaller towns in the immediate vicinity.

The climate here is delightful,—the summers pleasant, the winters mild,—and the water good. What more could be asked than is here set forth to build a great manufacturing city? And yet I have sketched but a few of its many resources.

The original proprietors owned hotels and warehouses, operated a line of railway three miles from their town of Etawah to the junction with the Western & Atlanta Railroad; the road-bed is to-day in fine condition; the town in ruins.

The property is within the gold belt of North Georgia. Some washing has been carried on, though no extensive development has been made.

A fine bed of sandstone extends through the property; in some places it is found flexible, in others hard and fine-grained.—A ledge of baryta has been traced through the property, but is at present undeveloped.

It would be impossible to estimate the real value of the above property; it can only be done when capital has fully developed all its resources. The water power alone, estimated by a comparative value with the cost of the Augusta power, is worth many times the value for which it is held by the present company, of which Capt. Cain Glover, of Rome, Ga., is president.

Never since the war has this property been in shape to place before the public until the present. Owners gathered together the varied interests. These gentlemen are not in a financial condition to fully develop this property and its resources, but stand ready to combine their interests with parties having capital to do it, or will sell the property to them.

It is worthy the investigation of capitalists.

White's Flexible Metallic Fillet for Pattern Makers.

It is necessary to say but few words in regard to the advantages of White's Flexible Metallic Fillet, for pattern makers, which we illustrate, over anything that has heretofore been used, and those who study the interests of their employers realize at

once the time and labor saved by its use. It not only gives a better finish to patterns, but may be applied in one-tenth the time required to carve wood fillets, and makes a permanent job, not being affected by either heat, cold or moisture. It is endorsed by those who have used it as the best fillet made. Further information can be obtained from the H. B. Smith Machine Co., 925 Market street, Philadelphia.

New Direct-Acting Steam Pump.

The Valley Machine Co., of Easthampton, Mass., have lately added to their list of manufactures a direct-acting, or automatic valve-motion, steam pump, for which the makers claim extreme simplicity with all the advantages incident thereto.

The accompanying engravings give a very clear idea of the construction and action of this machine. Fig 1 is a plan of the steam valve seats, with the ports for both main and supplemental valves. Fig. 2 exhibits the steam chest uncovered and the valves in position. Fig. 3 represents the supplemental valve, and Fig. 4 the main valve. Fig. 5 is a perspective view of the machine.

Referring to the details of the design, we may add to the foregoing that both the main and supplemental valves are flat slides working on the same plane, the main valve having a groove cut through the face, thus making a double-faced valve of it. The supplemental valve likewise is double-faced, the two faces being connected by a web. This web fits into the groove in the face of the main valve, and allows both valves to slide on their seats, independently of each other. The main valve is worked from the valve piston, and the supplemental valve from the tappet arm. The valve seats, piston rod, stuffing boxes and glands, water piston and head, tappets on the valve rod, and other parts where it will answer a better purpose than the cheaper metals, are composition metal.

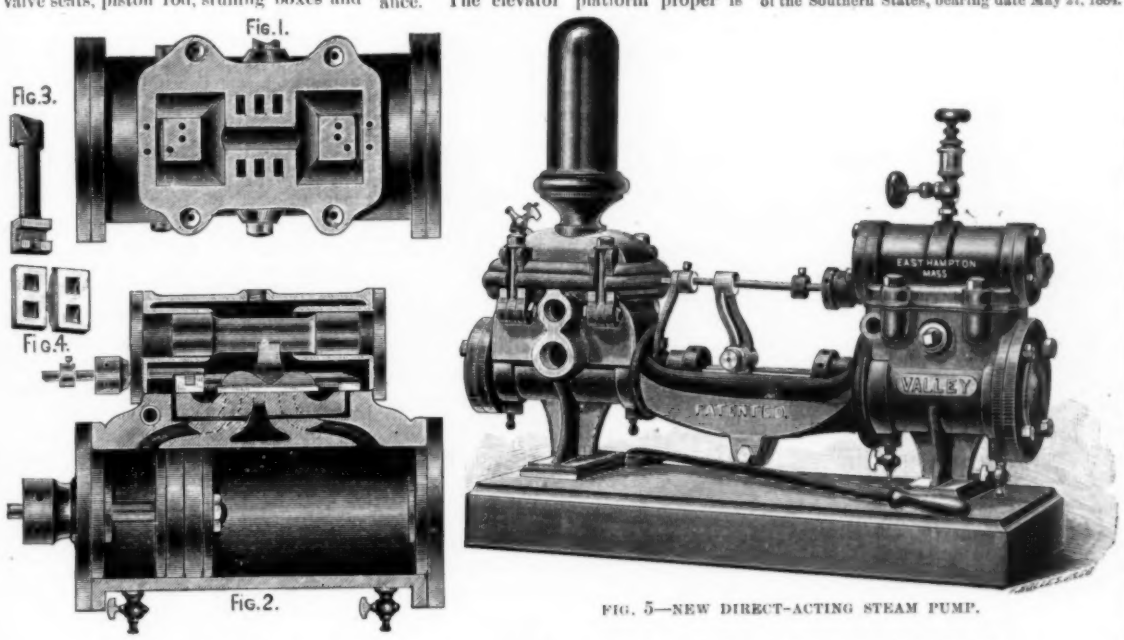

FIG. 5—NEW DIRECT-ACTING STEAM PUMP.

From the foregoing description our readers will be able to form a correct estimate of the efficiency of this admirably simple steam pump. We must refer to the makers, the Valley Machine Company, of Easthampton, Mass., for additional particulars.

Don't Forget the Little Ones.

How many a young heart has been made glad in anticipation of a visit to the great metropolis. The cost of bringing wife and child, or children, as the case may be, especially if you stop at the Grand Union Hotel, opposite Grand Central Depot, and save $3 carriage hire and expense of baggage transfer, will prove but nominal compared with the happiness imparted. When again visiting New York via Grand Central Depot, bring your family and enstall them in one of this hotel's elegant suites, where they can live better for less money than at any other strictly first-class hotel in the city; and in place of hiring a hack for sight-seeing, you can step on the Third or Sixth avenue elevated trains, horse-cars or stages, and reach any point of interest in a few minutes, including the great Brooklyn bridge, at the rate of 5 or 10 cents each. Remember these facts and prove them at your first opportunity. ‡

Something about Elevators

Messrs. Clem & Morse, elevator builders, Philadelphia, have just been awarded a contract by J. T. Farren & Co., of Baltimore, to erect one of their one-ton capacity Albro-Hindley screw elevators, with patent automatic hatch doors.

In a recent test made by Prof. R. H. Thurston, at the Stevens Institute of Technology, it was demonstrated that the co efficient of friction in the Albro-Hindley screw gearing used by Clem & Morse in their elevators is only about one-half as great as in the best straight worm gearing, such as is used by other elevator builders. The following description of their patent pneumatic safety clutch, clipped from a recent issue of the Albany (N. Y.) Morning Express, will prove interesting to all users of elevators:

ELEVATOR EXHIBITION.

"Messrs. Clem & Morse, of Philadelphia, have recently put three elevators in the new Arcade Block on Hudson avenue. One of these is supplied with the new improved pneumatic safety catch, and two exhibitions were given yesterday to test its utility. The first exhibition occurred at 10 A M, a number of prominent citizens, manufacturers and newspaper representatives being present; and the exhibitor, Mr. Wm. P. Gorges, explained the new appliance. The elevator platform proper is guid d by ash strips, three inches wide, and extending the full depth of the well. The safety catch is attached to the bottom of the platform and consists of a half-inch poplar board resting on springs; any pressure on this sub-platform causes two steel shafts, the full width of the platform, to revolve. The shafts are furnished at either end with toothed eccentrics, which, the moment the shafts revolve, clutch the ash guiding strips, and motion is almost immediately arrested. The appliance works automatically by means of atmospheric resistance of the air beneath the elevator, caused by the accelerated speed incidental to a breakage of the cable. The elevator was raised about ten feet at the morning exhibition, and the cable separated at that distance.

In the afternoon, at three o'clock, a representative of the Express was present, and saw several much more satisfactory tests. The reporter thought that the exhibition would be more interesting if the rope was cut at a greater elevation, and the exhibitors, Prof. Richard Prescott, E. E. Mack, Esq., and Mr. W. H. Paddock, placed themselves upon the elevator, which rapidly ascended to midway between the fourth and fifth stories, when Mr. Gorges mounted to the cross-piece armed with a keen-edged hatchet. The *voyageurs* held their breaths as the edge was applied to the rope; the rope separated and the elevator fell—1½ inches, and with scarcely a shock. The apparatus was lowered and the party ascended once more, and this time a very practical and unexpected test resulted; the rope accidentally parted of its own accord and the catch again worked to a charm. It occurred to the Express man that in the event of one being caught at the bottom of the well while the elevator was descending, he might prevent himself from being crushed to death by striking the safety catch with his hands as soon as it came in reach. Mr. Gorges was glad to be afforded the opportunity of trying the experiment, and, accompanied by Mr. Paddock, he descended to the bottom of the well, while the elevator, under charge of Prof. Prescott, was rapidly lowered from the fourth story. The experiment was entirely successful and the platform stopped just three inches above the gentlemen's heads. After a careful examination we were at a loss to determine how any device could be more perfect and safe than the one exhibited." Clem & Morse are represented in Baltimore by Messrs. Morton, Reed & Co., 61 German street.

List of Patents.

The following patents were granted to citizens of the Southern States, bearing date May 27, 1884.

Reported expressly for this paper by Louis Bagger & Co., mechanical experts and solicitors of patents, Washington, D. C.

299,320. Baker, W. S. G., Baltimore, Md. Car axle-box.
299,321. Baker, W. S. G., Baltimore, Md. Car axle lubricating device.
299,335 Bolgiano, G. C., Baltimore, Md. Sash holder.
299,337. Brotherhood, Fred., Charleston, S. C. Apparatus for washing phosphate rock, ores, &c.
299,339. Buchnan, W. M., Columbia, Tenn. Two-wheeled vehicle.
299,340. Burner, C. C., Traveller's Repose, W. Va. Grinding mill.
299,342. Caldwell, W. J., Rives, Tenn. Car starter.
299,347. Chisholm, W. R., Laredo, Tex. Irrigating apparatus.
299,201. Clark, E. S., The Plains, Va. Car-coupling.
299,349. Clayton, G. A. F., Masonville, Va. Saw set.
299,207. De Blanc, G. S., New Orleans, La. Street car fare-box.
299,119. Dueber, J. C., Newport, Ky. Manufacture of watch-case centres.
299,361. Eiker, T. B., Baltimore, Md. Head-rest.
299,378. Green, J. J., Jackson, Miss. Removing fiber from cotton seed.
299,139. Heflin, C. D., Roanoke, Tex. Cotton press.
299,224. Humbert, J. H., Onan, Va. Lifting jack.
299,398. Jones, Jacob, Baltimore, Md. Letter-opener.
299,404. Knapp, G. W., Baltimore, Md. Machine for forming taper tubes.
299,233. Liddell, W. J. F., Charlotte, N. C. Circular saw-mill.
291,246. Murphy, R. T., Westminster, S. C. Sash-fastener.
299,160. Parrish, Henry, Horace, Ga. Cultivator-plow.
299,248. Myers & Kelly, Memphis, Tenn. Combined cotton-chopper and scraper.
299,417. O'Sullivan, M. J., Baltimore, Md. Call-box for district telegraphs.
299,494. Price, Anna J., Frostburg, Md. Caster for stoves.
299,620. Price, Geo. W., Baltimore, Md. Rotary steam engine.
299,273. Reynolds, Terrence, Atalla, Ala. Dumping car.
299,439. Tabony, J. H., New Orleans, La. Meat-clamp.
299,441. Whitlock & Etheridge, Paris, Tenn.—Plow.

NEW PUBLICATIONS.

THE May number of the Southern Historical Society Papers contains some valuable contributions to history. The contents are "Reconstruction in South Carolina," by Prof. F. A. Porcher; "Story of the Arkansas," by Geo. W. Gift; "Letters from Ft. Sumter," by Lt. Iredell Jones; Diary of Rev. J. G. Law; "Chickamauga," a reply to Maj. Sykes, by James M. Goggin, A. A. Gen. McLaws' division; report of Gen. E. W. Pettus of Operations at Lookout Mountain; Battle of Drewry's Bluff, May 16, 1864; report of Gen. R. F. Hoke; report of Gen. Johnson Hagood; Woolsley's Tribute to Lee and Jackson; The Burning of Columbia—Affidavit of Mrs. Agnes Law, etc. This publication is issued monthly by Southern Historical Society, under the editorship of J. Wm. Jones, the secretary. It is invaluable to those who want to get at the truth of the history of the civil war, as furnished by the principal participants themselves.

THE CHRISTIAN UNION.—Emerson once said of Mrs. Helen Jackson ("H. H.") that she stood on the threshold of a great achievement. The large and increasing circle of her readers are doubtless satisfied that Mr Emerson's prophecy was fulfilled years ago; if any doubt remained, it would certainly be removed by the beauty, pathos and power of Mrs. Jackson's story, "Ramona," now being published in The Christian Union, 20 Lafayette Place, New York. For dramatic interest, narrative skill and deep feeling no story of recent years has equalled it.

The *State Chronicle*, of Raleigh, N. C., of May 31, consisted of 12 pages, devoted wholly to the rapidly growing tobacco interests of North Carolina. It was a magnificent number of that most enterprising journal, reflecting great credit upon all connected with it. The edition was 25,000 copies, which we suppose is the largest number ever issued at one time by any paper in North Carolina.

A pamphlet of about 70 pages, entitled SALEM AND THE ROANOKE VALLEY, has been issued for free distribution, with a view of setting forth the many advantages of Salem, Va., for trade and manufactures, as well as a place of residence. It contains much information of interest. Copies can be had of J. T. Crabtree, Salem, Va.

Important to Southerners.

Persons arriving in New York via Cortlandt Street Ferry, by taking the 6th Avenue Elevated Train, corner Church and Cortlandt streets, can reach the Grand Union Hotel in 42d street, opposite Grand Central Depot, in twenty minutes, and save $3 carriage hire. If en route to Saratoga or other summer resorts via Grand Central Depot, all baggage will be transferred from hotel to this depot free. 600 elegantly furnished rooms $1 and upwards per day. Restaurant the best and cheapest in city. Families can live better for less money at this hotel than at any other first-class hotel in the city. ‡

CONSTRUCTION DEPARTMENT.

We publish, every week, a list of every new factory, of whatever kind, projected anywhere in the South; every railroad undertaken, and every mining company organized. This information is always fresh, and, by enabling manufacturers to correspond with the projectors of such enterprises before their supplies of machinery have been purchased, is of great value. Manufacturers will find it to their interest to read this department carefully each week.

B. G. Lockett & Co., Atlanta, Ala , will build the large freight depot to be erected at that city by the Georgia Pacific Railroad.

The Charleston Bridge Co., Charleston, S. C., will probably award contract for a $50,000 or $60,000 iron bridge some time in June. Bids desired.

The Richmond Cedar Works Co. of Richmond, Va., whose mill was burned some time since, causing a loss of $75,000, have commenced work on their new buildings. We reported at the time of the fire that the works would be rebuilt. Will require a 300-horse power boiler.

Fuller & Basil, Russell, Ky., are putting up a saw mill.

The Soddy Coal and Coke Co. of Chattanooga, Tenn., are making extensive additions to their plant at Soddy, Tenn., putting up coal washers, crushers, elevators, conveyors, &c.

The Norton Iron Works of Ashland, Ky., are making good progress in rebuilding their extensive works. It is probable that they will be ready to start up in August.

A. M. Riggsbee, Durham, N. C., contemplates erecting a hotel.

Contracts have been given for the brick for a large tobacco factory to be built at Kernersville, N. C., by Beard & Co.

The erection of large boiler works in Mobile is contemplated.

The Fairview Coal and Mining Co., Fairview, Ala., are opening new coal mines in the Coosa coal regions.

It is reported that the Broken Arrow Coal and Mining Co., of Broken Arrow, Ala., will lease their mines, to be worked on a still larger scale.

It is reported that a Northern capitalist will build a cotton factory in Claremont, Va.

The Edison Electric Light Co., of Knoxville, Tenn., previously reported as organizing, has been incorporated to introduce electric light; stock $40,000.

The Dayton Coal and Iron Co., of Dayton, Tenn., is the name of the English company previously mentioned as proposing to build two 125-ton furnaces at Dayton. The ground has been broken, and their construction will be pushed forward.

The large shops of the New Orleans & Northeast Railway, at Meridian, Miss., previously mentioned, will be finished about September. They will be supplied with best machinery.

The City Council, Corsicana, Texas, will build a $6,500 school house.

The property known as the "Old Sims Mill," in Pickens county, S. C., is being overhauled and much new machinery put in.

J. L. Murray, George's, S. C., is putting up a large saw and planing mill.

Incorporated in Newport, Ky.—the Whitcomb Steel Compound Co ; stock $500,000. Incorporators are E. E. Wood, Robert Waring and Wm. M. Shaw.

Tyson & Watson, Atlanta, Ga., have formed partnership to manufacture sash, doors, &c.; special capital $5,000

Gaston & Culbertson, Paris, Texas, have purchased ground for a cotton-seed oil mill.

The Meridian Fertilizer Factory, stock $50,000, has been organized at Meridian, Miss., with C. Berney pres dent, W. L. Goldsmith general manager, and G. W. Meyer treasurer. Will manufacture fertilizers.

E. J. Brown is building a saw and planing mill at Yates Point, near Kissimmee, Fla.

D. Perry and A. Mallory, Pensacola, Fla., are putting $3,000 worth of machinery into a steam laundry.

The project for a cotton mill in Aberdeen, Miss., previously reported, is meeting with favor, and over $40,000 was subscribed in a few hours. Proposed capital $100,0000. Committee in charge: Jacob Guttman, C. W. Gibson and C. C. Heison.

A new $10,000 building, to be called the Alabama Hall, is to be erected on the Normal School grounds at Tuskaloosa, Ala.

Talladega, Ala., is figuring on the cost of water-works.

Some prospect of a rice-cleaning mill in Elizabeth City, N. C.

B. F. Tresler, Jr., of Aurora, Ind., will build a $12,598 courthouse in Trimble county, Ky.

Charles Hammond, Greenville, S. C., will start large brickyard.

The Erlanger Syndicate has awarded the contract for 2,000,000 brick, for the building of their new railroad machine shops at Meridian, Miss., to C. W. Robinson, of Meridian. These shops will employ about 400 men when completed.

The Warren Glass Works Co., of Cumberland, Md., have shut down to rebuild their furnace, &c. Will take a month or more to complete the repairs.

The boiler at Ozias & Blackburn's sash factory, Cleveland, Tenn., exploded, but did no serious damage to machinery.

A $10,000 Methodist college will probably be built at Cleveland, Tenn.

About $10,000 has been raised for the street railroad in Rome, Ga.. which will now be built.

The Central Presbyterian Church, Atlanta, Ga., will erect a $75,000 to $100,000 church. The West End Methodist Church, in the same city, will also put up new building.

Chamberlin, Johnson & Co., Atlanta, Ga., will erect a $40,000 house.

A new court-house is to be built at Decatur, Ga., and contractors are invited to correspond with Judge F. F. Edward.

Elyton Land Co., Birmingham, Ala., will build a new street railroad.

There is talk of another foundry and machine shop being erected in Calera, Ala., soon.

The glass factory company lately organized at Morrillton, Ark., has been incorporated as the Arkansas Valley Glass Co.; capital, $25,000. Will erect factory very soon.

Denis Dean & Son have purchased land from Gress & Meyers, of Morrillton, Ark., and will erect large saw mill.

A canning factory will probably be erected in Raleigh, N. C.

The New Venice Saw Mill, at Pascagoula, Miss., is being overhauled and repaired.

Ellis & McClure are preparing plans for the large hotel to be built at Monticello, Fla.

The Tompkins Machinery and Implement Co., Dallas, Texas, capital $250,000, has been organized.

The cotton mill lately reported as being erected at Columbus, Ga., by Mr. Jas. A. Lewis, will be a small factory for dress plaid and cottonades. Will not put any spindles in for the present.

Col. Ed. Richardson, of New Orleans, is preparing to build the 60 miles of railroad reported some months ago.

Burnside Bros.' tobacco factory, at Lancaster, Ky., which they will soon build, is to be 84x150 feet.

A company has been organized in London, Eng., as the North American Land and Timber Co., capital $2,500,000, for the purpose of operating in Louisiana. They have purchased 1,500,000 acres of land, which will be drained by steam dredging, improved, &c. Engineering and mechanical part of the business is under direction of Prof. Alexander Thompson. The American office of the company is at Lake Charles, La.

BURNED.

Saw mill of R. B. Reppard, near Blackshear, Ga.; loss heavy.

Mill of Mr. Shamburgher, near Hawkins, Texas.

Plow works and machine shops of Baxter Shemwell, at Charlotte, N. C.; loss $3,500.

W. Rieppe's grist mill, Charleston, S. C.; loss about $4,000.

Barrel factory of Hurley, Grey & Co., and works of the Mobile Electric Light Co., at Mobile, Ala.; loss $60,000.

Steam saw and grist mill of Frank Owings, Fairhaven, Md.

CORRESPONDENCE relating to the manufacturing, mining, lumbering and all other material interests of the Southern States is solicited. We invite those interested in the development of the South to make free use of our columns. Reaching so many capitalists in all parts of the United States seeking profitable investment in the South, the MANUFACTURERS' RECORD offers an excellent chance for the people in that section to place the advantages of each locality before those likely to be interested. We will take great pleasure at all times in telling what has already been accomplished in the South, and showing up the opportunities of doing still more,—so if you desire to attract immigration or capital, or if you know of an opening for profitable investment in manufacturing, mining or kindred pursuits, write us an account of it It will be published free of cost.

THE MANUFACTURERS' RECORD, published in Baltimore, is doing a good work for the South. Its editors have discernment enough to see that there is a bigger boom in store for this section than has yet been forecast, and it has labored zealously in aiding to unfold its resources.—*Daily Review*, Wilmington, S. C.

THE Betts Machine Company, Wilmington, Del., have just put in the foundation for a new erecting shop. It will be 122 feet long by 75 feet wide, with the centre 25 feet high and the sides about 16 feet each. They are making it practically fireproof, being composed of iron and brick, with very little wood-work. The centre of the building will be supported on wrought-iron columns, and these columns will also support the plate girders, on which one of the Morgan Engineering Company's twenty-ton traveling cranes will run. The shop will be well lighted, and in every way suited to the erection of large tools. The traveling crane is of the latest and most improved construction, and will, of course, be driven by power. The Edge Moor Iron Company have the contract for the iron work, and will deliver it next month. Should the weather prove favorable, the building will be under roof not later than the end of June. This addition to the already extensive works of the company will give them greatly increased facilities for handling their constantly growing business.—American Machinist.

THE attention of our readers is asked to the very excellent exhibit of sales made by the Westinghouse Engine Company, as it appears in this issue of the MANUFACTURERS' RECORD. Evidently there are no dull times with the manufacturers of these engines, their sales being not only very liberal, but each month showing a marked increase over the preceding one. The Westinghouse Engine Company know that their engine is a first-class piece of machinery, for which they feel justified in making strong claims; and having faith in their engine they also have faith in advertising it, and the results of these two is the remarkable list of sales published by us to-day. If any of our readers contemplate the purchase of an engine we would advise them, before making a selection, to write to the Westinghouse Engine Company for catalogues and prices.

THE most complete compendium of information that we have seen for a long time is in the shape of a neat little volume in gold and red, recently published by Messrs. Jones & Laughlins, Pittsburgh, with the title of "Useful Information for Business Men, Mechanics and Engineers." It commences with an exposition of the relative merits of hot and cold-rolled shafting, as shown by exhaustive experiments. Then follow rules for ascertaining the transmitting efficiency and horse-power of shafting, rules for calculating the speed of pulleys, &c., notes on belting, and a vast number of tables, formulæ, rules, &c., containing an incalculable amount of information. The book was issued for gratuitous distribution among the customers of the firm; to others it will be sent on receipt of 30 cents, which just covers its cost.

MR. FREDERICK E. SEWARD, editor of the *Coal Trade Journal*, has issued his eleventh annual compendium of The Coal Trade, containing much valuable information relating to coal production, prices, transportation, &c To all interested in coal this small volume of 100 pages is almost invaluable.

LOCKWOOD, GREENE & CO.
MILL ENGINEERS
Office, 65 Westminster St., Providence, R. I.
Carefully prepared plans, specifications and estimates furnished for the construction, equipment and organization of new mills and the revision and improvement of old.

MANUFACTURING.

Subscribe to the Baltimore Manufacturers' Record. Price $3 per year.

BALTIMORE.

MR. WM. L. PETTIT, manufacturer of boilers, No. 40 York street, has quite a large amount of new and general repair work. He has had more business during the past month than for any one month during the year, and the prospects are that this increase in the volume of business will continue for quite a time.

MESSRS. WRIGHT & COLWELL, brass finishers, Lee street, have received a number of orders for firms in the city and the South. They report the Southern business as very promising. They solicit orders for boilers, and have received two to be completed at an early date.

MR. W. J. CHAPMAN, York and William streets, direct shipper of coal and Connellsville coke, has shipped three or four carloads of coke to the South, and is in receipt of large orders from the manufacturing concerns in this city. The coke for which he is agent is a very superior article, and as such is becoming very popular.

MESSRS. JAMES MURRAY & SON report a briskness in their business, which has continued so for some time. They have done a considerable amount of brick-work machinery during the past season, in addition to large orders for repair work.

MR. RICHARD SAUER, manufacturer of all kinds of show cases, store and office fixtures, corner German and Eutaw streets, has enough orders on his books to keep a large force at work, while he is steadily adding to the number of his employees. He manufactures every style and design of show cases, store, bank and office fixtures, such as wall cases, counters, desks, &c.

MESSRS. HARRIS & SHEARER, proprietors of the Liberty Brass Works, 45 S. Liberty street, have received orders from the city, and also from the extreme South, for brass work, of which some of the finest kind is turned out by this firm, polished and ready for use.

H. C. BROWN, No. 1 Uhler's alley, manufacturer of saws, reports his business as brisk. He has received three large circular saws to be gummed, which he makes a specialty.

MR. JAMES BATES, corner Pratt and President streets, is receiving orders for his well-known elevators, (hydraulic, steam and hand,) which are all favorably known, especially throughout the South, from where he has received a great many orders. Mr. Bates also makes iron castings of all descriptions, and finds business quite brisk in this branch.

MR. JOHN N. MARQUETTE, machinist, W. Falls avenue, is doing considerable repair work and some little new work. He has been very busy for the past two months.

IN GENERAL.

THE Holyoke Machine Co., of Holyoke, Mass., have sent out a handsome card, on one side of which is a cut of "The Hercules" Water Wheel. On the other side it is said that a "a good water wheel increases the value of your whole plant. Get the best at first and avoid the expense and delay of changing wheels. A good wheel will serve you well for twenty years. The best is the cheapest,—it does more work, lasts longer and costs no more for gears and setting than a common wheel. The Hercules gives the most power for its size, and the highest average percentage from full to one-half gate of any wheel ever made."

E. MATHER, agent of the Jarvis Engineering Co. for Harrisburg, Pa., is setting two tubular boilers with the Jarvis Patent Boilers Setting, at the new flour mill, Steelton, Pa.

The Derby Desks.

The business office of to-day is a vast improvement upon its predecessor of twenty years ago. Formerly it was thought that any sort of a place was good enough to transact business in Business men fitted up their houses with costly furniture and appointments, but were content to sit all day in a dingy office with a bare floor, and do their writing on a dilapidated desk that had probably come down through the ages. Now they do things differently. Men have learned to see the incongruity of sleeping in a palace and spending three-fourths of the time they are awake in a hog-pen; and through gradual stages of development the office has reached a point of elegance approaching that of the private dwelling. And not in matters of comfort or convenience only has there been improvement; there are probably greater evidences of advancement in the numerous appliances for the saving of time and labor.

OVERHUNG DESK.

Embodying both these features, the modern roll-top desk has grown to be a necessity in every well-conducted office.—Its advantages are numerous.

Business men often have to leave their desks filled with incomplete papers and memoranda, to meet imperative calls at a moment's notice, and the roll-top desk, with its spring lock, allows him to leave his papers as they are, ready for the instant resuming of work, and insuring perfect safety and privacy. Another advantage of the "roll-top" is the arrangement of the "pigeon-holes" and drawers, properly labelled, by means of which an almost automatic classification of memoranda and work is easily made.

LOW, ROUND-TOP DESK.

Most every furniture and cabinet maker makes the manufacture of roll-top desks a part of his business, but among all the many styles produced the Derby Roll-Top Desk stands pre-eminent. The Derby Desk is made by the Derby & Kilmer Desk Co., Boston, and has an established reputation as a superior article, the best material and workmanship entering into its construction, the plan of which is entirely the invention of the firm. There are no loose mouldings in the work. Everything is coped in making a firm, substantial finish, and giving a handsome appearance. All mouldings are worked on solid wood, and black walnut and cherry stock are generally used.

Some other features pertaining to the Derby desk are that the rolling top is made of selected stock, with the Derby improved roll-laying machine; a combination spring lock that fastens the entire desk; drawers, interiorly divided by movable partitions, the spaces between which can be adjusted to hold different sized blanks, papers, etc.; panels of double the ordinary thickness; many conveniences, such as two hollow pen rests, and the same number of slide tablets and secret bracket drawers, letter drop, book spaces in deep drawers, card and paper racks, etc.

Two very desirable styles of desk are shown in the cuts, the lower one being a very convenient office desk made in black walnut and cherry, with low, round top, which can be seen over while sitting before it, a decided advantage. The upper cut represents an "overhung desk," as it is called, made in black walnut, cherry, ash, oak, and plain solid mahogany, in two sizes: four feet six inches wide, and five feet wide, with book rack in deep lower drawers. The interior arrangement of these desks is seen at a glance to be particularly convenient.

The Derby desks are in great demand throughout the country, and shipments are made as far West as California, and South to the Gulf States and Mexico, agents in the larger Western cities serving as distributors over their respective sections, and numbers are sold for export trade through resident agents of foreign houses.

Other designs are square-cornered desks, secretary roll-tops, tops with adjustable pigeon-hole case, library desks and roll-top book-case desks.

The company took the medal of superiority for its desks at American Institute Fair in New York last year and the year before, and was given the highest award as manufacturers of the best roll-top desk at the Southern Exposition at Louisville last fall.

These desks are made in a great variety of styles, and are sold at reasonable prices. Manufacturers, business men, and others, contemplating the purchase of office desks will find it to their advantage to send to the Derby & Kilmer Desk Co., Boston, for their handsomely illustrated catalogue and price-list.

Cincinnati Iron Market Report.

Specially reported by ROGERS, BROWN & Co., Pig Iron Commission.

CINCINNATI, June 2, 1884.

Excepting one or two large transactions, the week's business has been very light. Sales aggregating 2,500 tons were made by a Southern coke furnace at a point further West, but scarcely anything else beyond car-load orders is reported. Most consumers of iron are running exceedingly close in pig iron stocks; and should their own business show improvement, would quickly become liberal buyers. But this improvement is not visible yet. The action of the mills in signing the scale will make the market for mill iron more active, but no advance in prices is looked for at present. We quote for cash f. o. b. cars Cincinnati:

Specially reported by E. L. HARPER & Co.

CINCINNATI, June 2, 1884.

The uncertainty that has prevailed and been felt as to the threatened strike at the rolling mills has been removed by the mill proprietors having signed the last year scale. Thus the interruption has been averted. Some of the mills will doubtless be obliged to close for a brief season to make annual repairs, but the prospects justify the expectation that the demand for manufactured iron will increase during the summer and absorb readily the usual production. The mills continuing will necessitate the movement of mill grades of pig iron, which will stimulate the market perceptibly. There is no change otherwise in the aspect of the market. General business is not active and prices are in sympathy with the moderate demand. We quote as current prices:

Richmond Iron Market.

Specially reported by ASA SNYDER, dealer in Scotch and American Pig Irons.

RICHMOND, VA., June 2, 1884.

A review of the iron trade for the past month will not pan out as satisfactorily as many predicted. The number of orders booked is large, yet as average they are for car-load lots. Some of the Virginia furnaces have blown out, while others have greatly decreased their output, so that we may now say with safety that consumption and production are running an even race. Prices are as follows:

PIG IRONS.

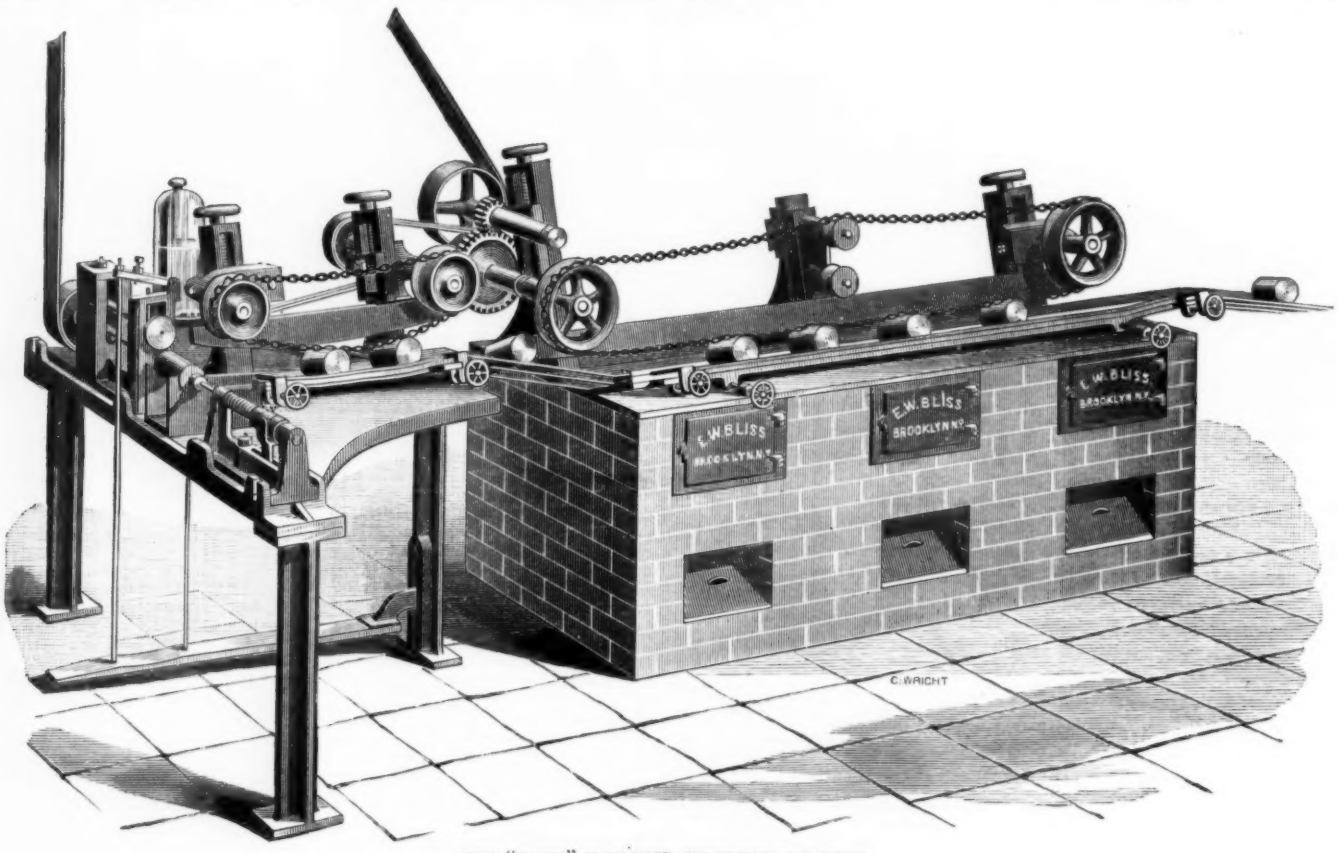
Important to Can Makers.

Through the courtesy of Mr. E. W. Bliss, of 17 Adams street, Brooklyn, N. Y., the well-known manufacturer of presses, dies and special machinery for stamping and handling sheet metals, we present to our readers an illustration of a new and important machine for soldering the ends of fruit, milk, paint and other circular cans.

The "Howe" machine is in extensive, and we may say almost universal, use in the fruit and salmon packing districts on the Pacific coast, where tops of cans filled with salmon are soldered with a rapidity unparalleled, and with a less percentage of leaks than when soldered by hand process. We are assured that both ends of 50,000 cans have been successfully soldered in the "Howe" machines in a day of ten hours by two unskilled workmen, and that a great saving is effected in the use of solder and in coppers, and that the machine will do the work of fifty skilled laborers.

We may say that a machine accomplishing such wonderful results is destined to revolutionize the can-making trade.



THE "HOWE" IMPROVED SOLDERING MACHINE.

The "Howe" machine is the essential element of success in the Messrs. Norton Bros. plant of automatic machinery for manufacturing fruit cans, now in successful operation in Chicago. It is durable and easily worked, no skilled labor being required. The operator places the can between the revolving chucks of the crimper, then presses the treadle with his foot, clamping the can and bringing the crimping blade to bear, thereby fastening the ends and body together. The pressure on the treadle being removed, the can drops upon the incline, rolls under the belt of the aciding machine, which rolls it along with the lower corner of the seam immersed in the acid. The can then passes down the incline, under the belt of the soldering machine, which rolls the can along, making several revolutions with the seam immersed in the molten solder, thus insuring the penetration of the solder in the seam. The can then passes down an incline, where the solder is cooled.

Mr. Bliss is the sole manufacturer under numerous letters patent of the United States, covering the different features of the machine.

THE MARKETS.

OFFICE MANUFACTURERS' RECORD, BALTIMORE, June 4, 1884.

The stock market still continues rather weak, and investors are not disposed to put money into new enterprises until the condition of business is more satisfactory. The appointment of receivers for the Reading Railroad Company so soon after the management of the road had been taken out of the receivers' hands has had a somewhat depressing effect upon the market. On the whole, however, there is probably a rather better feeling than at the date of our last issue, the public having learned that the numerous bank failures were due more to fraudulent transactions than to any legitimate losses by hard times.

The outlook for the crops is generally regarded as very satisfactory, and should present expectations be realized there will doubtless be a marked improvement in business after harvest.

Business in manufactured iron continues limited and prices rather disposed to weakness since it has been decided that there is to be no strike. The nominal quotations are unchanged, and we repeat, viz:

Ref. Bar Iron, 1 to 6x⅜ to 1.....	₩ lb.	1.9@	2 c
" " 1 to 4½x1½ to 1..	"	1.9@	2 c
" " ⅜ to 2, round and square.....	"	1.9@	2 c
Hoop Iron, 1½ wide and upward	"	2.8@	3 c
Band Iron, from 1½ to 6 in. wide	"	2½@	2.6c
Horseshoe Iron.....	"	3.2@	3.3c
Norway Nail Rods.....	"	5 @	5½c
Black Diamond Cast Steel....	"	10 @	11 c
Machinery Steel.....	"	4½@	4¾c
Spring Steel.....	"	3½@	4 c
Common Horse Nails.....	"	10 @	11 c
Railroad Spikes, 5½x9-16.....	"	2.5@	2.6c

The demand for pig iron shows no change, sales being moderately fair, but only as needed by consumers for immediate wants. We quote, viz:

Baltimore Charcoal Wheel Iron (all Baltimore ore)..	$28 00@29 00
Virginia C. B. Charcoal Wheel Iron..	28 00@— —
Anthracite, No. 1.....	21 00@23 00
" " 2.....	20 00@21 00
" " 3.....	18 00@20 00
" Mottled and White.....	16 00@17 00

Not the least important of the objects of interest in Cincinnati is the Palace Hotel, which is an imposing structure eight stories high, fronting on three streets. All the floors are reached by elevators; the office and dining-room are lighted by electricity, and it is provided with all the modern aids to comfort and convenience. The rooms are newly papered and it is elegantly furnished throughout. ‡

Philadelphia Iron Market.

PHILADELPHIA, June 2, 1884.

The Eastern Pennsylvania iron trade is in neither better nor worse condition this week than last; demand for all kinds of iron and steel continues light for the season, and orders are all small, but the aggregate of business is fair, and no great weakness in prices is to be noted. The best brands of forge and foundry iron are selling steadily at firm prices, consumption being about equal to the output; but of the inferior makes there are abundant stocks, and the pressure of weak holders to sell has led to the naming of unprecedentedly low prices. In these irons sales have been made in limited lots at $16.50 delivered for Grey Forge, $18 for No. 2 foundry, and $19 50 for No. 1 foundry; standard and special brands remain at the usual limits of $20 to $21 for No. 1, $19 for No. 2, and $18 to $18.50 for Grey Forge. American Bessemer is under inquiry at $18 at furnace, and is gradually driving out the foreign article, for which $19.50 to $20 is asked. Spiegeleisen is quoted at $27.50 to $28 for 20%.

Manufactured iron is selling in small lots at 1.85 to 2 cts. for best refined, and from that down to 1.60, according to quality; plate, tank and structural iron are in fair demand for immediate requirements, but no large orders are being given out.—Mills are pretty sure of work for the summer; bridge works are busy, and, as usual, are favored with more business than is received by other mills. Bridge plates are quoted at 2.25, and are firm. Angles and common plate are rather weak at 2 10 to 2.20; beams and channels have sold as low as 3.40; thin sheet iron and galvanized are in good demand, and mills are busy; wrought iron pipe is quiet at steady prices.

Nails are selling at $2.45 to $2 50 in large lots, of which very few are being placed. There is a good deal of demand for small lots, for which the prices range a little higher.

There are rumors of large sales of steel rails at $31.50, but nothing definite can be learned as to this business, and the companies here are holding to $33 as their inside price for small lots. At this price but little business is being done. There are very few buyers for old rails at any price; $21 to $21 50 is quoted for foreign tees. Scrap iron of all kinds is weak and dull.

HARDWARE.

For harvest tools there is still a fair trade, and for other lines of season goods, such as cherry seeders, fruit parers, &c., the demand is active, but in general hardware business is only moderate.

The signing of the wage-scale by Pittsburgh iron manufacturers has tended to weaken nails, and while prices are nominally as before—$2.50 to $2.60—it is understood that concessions could be obtained.

The Scott Manfg. Co., of this city, are working a full force on their rotary pea grading machines, pineapple slicers, improved Hopper cherry seeders, Phillips fruit evaporators, rotary knife peach parers, and other specialties, which they are shipping to all parts of the country. In compliance with a demand from packers all over the country, they have made a "Mammoth" rotary-knife peach parer on the same principle as the family rotary-knife parer, but designed for packers and evaporators. Have large orders for them They are at work on their improved Victor apple parer, corer and slicer, which is a marvel of simplicity and perfection. The demand still continues for their Gray's shingle and sawing machines.

St. Louis Iron Market.

Specially reported by HOFFER & Co., Pig Iron and Iron Ore, No. 318 Olive Street.

" " Warm "	21 00@23 00

Specially reported by W. B. BELKNAP & Co., Nails, Wire, Iron, Hardware, Carriage and Wagon Goods.

LOUISVILLE, KY., June 2, 1884.

Bars continue dull, and no sort of price seems able to infuse any briskness into the trade. Wagon makers are using material a little more freely, but railroads are scrimping in every conceivable way, and probably will do so until the July payment interest is out of the way. This is enough to create a dullness of itself. Agricultural implement manufacturers are closing up their fiscal year, preparatory to shutting down in summer. Crop reports, however, are encouraging, though the season is late, and by July we expect to see a slight turn in the tide. Rumors of local strikes about to occur have not thus far affected prices. At present writing it would seem likely that last year's scale will be signed by the manufacturers.

Nails are jobbing in moderate quantities only. There is such a liberal supply that fine profit is almost out of the question.—There is some talk of another shut down, as it is a well-known fact that mills are piling up stock. Unanimity of sentiment on any given line of policy, however, seems more difficult to secure than heretofore, and it is doubtful if a general move be organized.

Wire.—There is a good demand for most kinds of plain wire. A lull in fencing has checked somewhat the run on barbed. Prices are evenly maintained and promise to stay so.

The general state of trade is about as usual for the season. It is not an unwise arrangement that the pic-nic and cheap excursion is coincident with thin orders.

Chattanooga Iron Market.

Specially reported by S. B. LOWE.

CHATTANOOGA, TENN., June 2, 1884.

The troubles of Wall street have materially affected some lines of business here and in the district further South. A number of enterprises that were in the process of materializing have been checked, and in some cases entirely suspended. A number of furnaces are out of the market for orders, having sold ahead for several months, and foundry irons are not plenty in the Southern District. All the furnaces in this immediate section are running full. In the Birmingham District three stacks are out. Prices are ruling low, which we quote as follows:

No. 1 Foundry	$17 00	@18 00
No. 2 Foundry	16 00	@16 50

BUSINESS CHANCES.

☞ For the purpose of making the MANUFACTURERS' RECORD a still more valuable medium of communication between its readers North and South, we will publish, FREE OF CHARGE, short advertisements, not exceeding 40 words, from those in the South who have mills, factories, manufacturing sites or water-power for sale, capital wanted for industrial enterprises, &c., &c.; while readers in other sections who desire to engage in manufactures at the South are also invited to use these columns, without cost, either in seeking information regarding the advantages and special claims of different localities, or for asking about good openings for men and money. This department is also free for Southern manufacturers who wish to advertise for mill managers, superintendents, engineers, &c.

In corresponding with any of these advertisers please mention the Baltimore Manufacturers' Record.

COTTON MACHINERY, now running in first-class order, for sale on easy terms, or might take part payment in stock. A rare chance for a new mill, or others wishing to increase their machinery, to secure a bargain. Particulars furnished by A. B. Pitkin, Manufacturers' Agency, Providence, R. I.

FOR SALE.—To close an estate, two cotton factories, known as "Beaver Creek and Bluff Mills," in Fayetteville, North Carolina, at public auct on, Tuesday, July 8th. Products: yarns and sheetings. Capacity per day 7,000 yards sheetings and 40 bundles yarn. Business prosperous. Address Beaver Creek and Bluff Mills, Fayetteville, N. C.

FLOUR MILL FOR SALE.—Steam flouring mill; three run of stones. Machinery in first-class condition. Best run of custom of any mill in this section. Everything favorable to large and profitable business Satisfactory reason for selling. For particulars address Harrison & Sons, Kenton, Tenn.

A ONE SET WOOLEN MILL FOR SALE CHEAP—Located four miles south of Jonesboro, Washington county, Tenn.; runs by water, about thirty-horse power; good two-story house, 40x80 feet, and a full set of machinery; only been run two years. Also another water-power on the same stream, with buildings, &c. As much land with each water-power as parties would want. Will sell for cash or exchange for farming land. Will give some time, on part payment. For further particulars address Henry Miller & Son, Carber's Mill, Tenn.

FOR SALE—A cotton mill situated on the line of the Illinois Central Railroad, near the city of Canton, Miss., in a splendid cotton region, good water supply, cheap fuel, labor abundant. The factory would be equally well adapted to ginning on a large scale, by improved methods, and cotton-seed-oil mill combined. The property consists of 28½ acres land, lying along the railroad; factory building 100 yards from the railroad, in the centre of the tract, substantially built brick, 300x90 feet; contains one English engine, 200-horse, two English lappers, shafting and pulleys. There is a double dwelling-house on the property. Bigsby & Edmonds, Baltimore, Md.

A THOROUGHLY competent Corliss engineer of 20 years experience with engines and boilers, wants a situation in the South. Understands cotton-mill engines. Best of references as to capabilities, habits, &c. Address ENGINEER, care MANUFACTURERS' RECORD.

A GOOD INVESTMENT.—Bearing Orange Grove, twenty miles south of Jacksonville, on the St. John's River, forty-three acres, title perfect. Six hundred orange trees—three hundred bearing. House of five rooms; fine water. Crop this year fifty thousand oranges. Address Orange Grove, care of MANUFACTURERS' RECORD, Baltimore, Maryland.

A PRACTICAL cotton manufacturer of New England, with an experience of 25 years as lessee and manager, wishes to negotiate for management of a Southern cotton mill. Will buy some of the stock, if satisfactory. Can furnish letters from some of the best men in the business. Address E. B., care MANUFACTURERS' RECORD.

MAN WANTED TO RUN A PAPER MILL.—A man who has experience in paper making and a few thousand dollars can find the necessary facilities and capital for putting up and running a paper mill at Salem, Roanoke county, Va. No paper mill within 150 miles. Address W. M. Graybill, Salem, Va.

WANTED.—A partner in a furniture manufacturing enterprise, 50 miles from Atlanta, Ga. Location is in a good country, immediately on the railroad. Shop, machinery and power all new and first-class. An experienced man with some capital will find this a good opening For further particulars address FURNITURE, MANUFACTURERS' RECORD.

SOUTHERN COTTON MILL FOR SALE.—One of the best-known and best-paying mills in the South, running 8,161 spindles, will be sold, to enable division of the property among heirs. Includes 100 acres of land, and river falls, water-power of 6,000-horse power, and can be cheaply increased to 18,000 or 20,000-horse power. Sites on the property for other factories. $50,000 to $60,000 worth of new machinery put in in last four years. Mill now in very prosperous condition. A stratum of granite runs through the place, affording an almost inexhaustible supply, as good as any in the country for building purposes. Pure water. Climate healthful and salubrious. Maps, plans, specifications, inventory, and all desired information furnished on application. Address
BIGSBY & EDMONDS,
Publishers MANUFACTURERS' RECORD, Baltimore.

FOR SALE.—A small cotton mill, now in operation in Calhoun county, Ala. Run by water power. Also grist mill. Fine opportunity for investment. Owner wants to sell on account of age and failing health. Address Jas. H. Savage, Ladiga, Ala.

WANTED TO KNOW.—Of good opening for a Hardware Store in the South. A place where the want of such an enterprise is felt. Would buy an established house if satisfactory. Address K F., Office MANUFACTURERS' RECORD, Baltimore, Md.

COTTON MILL FOR SALE.—A North Carolina cotton mill, with or without machinery. Well adapted and located for cotton or woolen manufacturing, hosiery, underclothing, rice milling, &c. A great bargain is offered. Satisfactory reasons for selling. Address Bigsby & Edmonds, Baltimore.

WOOLEN MILL AND WATER POWER FOR SALE.—Well located in West Virginia, buildings and machinery new, latter of most improved makes. One of the finest water powers in the State. Address G. W. M., care MANUFACTURERS' RECORD, Baltimore, Md.

PARTNER WANTED.—A practical man, to take an interest in one of the oldest and best-paying factories in the United States. Plenty of water-power, timber, &c. Big profits and ready sale for all goods made. Located in the most wholesome portion of Mississippi. Address Factory, care of MANUFACTURERS' RECORD, Baltimore, Md.

COTTON MILL FOR SALE.—Built in 1879, in the centre of cotton region; 3,000 spindles; machinery nearly new and first class. Whole can be bought at great sacrifice, or mill will be put into stock company. Full particulars upon application to Bigsby & Edmonds, 22 Second street, Baltimore.

WANTED.—Position to take charge of small foundry, or will unite with some one in the business, putting in small capital. Have had full experience. Tennessee or Georgia preferred. Address B., care MANUFACTURERS' RECORD, Baltimore.

SUPERINTENDENT OF COTTON MILL.—A gentleman of 15 years experience in cotton milling, now overseer of spinning department in a 10,000-spindle mill, wants position as superintendent of cotton mill in the South. Highest references, including present employers. Address P. M., care MANUFACTURERS' RECORD, Baltimore.

THE MANHATTAN MAGAZINE CO.,
Temple Court, New York City.

HOTEL WANTED.

Fincastle, a mountain town of southwest Virginia, only 5 miles from railroad, noted for its splendid climate and great healthfulness, with scenery unsurpassed in the State, offers a splendid opening for a hotel, either large or small.—Accommodations entirely inadequate to the demand.

A hundred yards or so from the town is a mineral spring, the waters of which possess great medicinal virtues, especially for liver and stomach troubles,—dyspepsia, &c. In fact this water has never been known to fail, even in the most aggravated cases of dyspepsia.

An unusually favorable opportunity is offered or building a hotel. Address

GEO. H. SWANN,
Secy. Fincastle Mineral Water Co.

Monumental Type Foundry!

JOHN G. MENGEL & CO.
Type Founders and Electrotypers,
No. 31 German Street, near Calvert,

WE take pleasure in calling the attention of our patrons, Printers, Newspaper Publishers, and the public in general to the removal of our establishment to the above desirable location. Our business has outgrown our present quarters, and we have fitted up three entire floors of this large and commodious building in the most complete manner for the execution of our work, having added to our already extensive facilities all the latest and most appoved machinery that can be used in the manufacture of TYPE, ELECTROTYPING, BRASS RULE, and the GENERAL PRINTERS' SUPPLY business, making it now by far the best equipped establishment of this kind in the city. We manufacture a line of beautiful Book and Newspaper Type, and use a superior metal in the manufacture of same, which we will furnish at very low prices, and guarantee satisfaction.

JOHN G. MENGEL & CO., 31 GERMAN ST.

Manufacturers of all kinds of Steam and Bath Boilers, Smoke Stacks, Water Tanks, Lard Ketties, &c. ☞Particular attention given to repairs.

Remington Standard Type-Writer

THE STANDARD WRITING MACHINE OF THE WORLD.

It much more than takes the place of the pen as it does the work of two or three penmen, and much more neatly and legibly. The business man will appreciate this saving of valuable time. Dictate your correspondence, etc., to a Type-Writer operator and have your time and strength for other matters. (Perfect press copies obtained in same way as of pen-writing.)

Again the Type-Writer is well-nigh indispensable to overworked professional men. It is a complete relief from the strain of pen-writing.

Lawyers have their papers written with the Type-Writer. Many copies can be made at one time, (absolute duplicates) thus multiplying speed.

Clergymen write their sermons with the Type-Writer, and hence can read them in a dim light.

Authors, journalists and others compose directly on the machine. It facilitates composition, as the manipulation becomes purely mechanical, and owing to its greater speed the mind does not lose its freshest and best thoughts, as when waiting for the slow pen to catch up. In use throughout the world. Perfect satisfaction guaranteed. Send for illustrated pamphlet, with testimonials.

WYCKOFF, SEAMANS & BENEDICT, 281 and 283 Broadway, New York.

COVERT

PATENT **Lariat Tether**

—AND—

PICKET PIN.

This Tether is made of ½-inch Jute or Manilla Rope, 30 feet in length, with the Covert Swivel Snap at each end, clamped on with the steel ring clamps. The Pin is 15 inches in length, manufactured of wrought iron with a movable attachment or swivel at the head, which, in connection with the swivel snaps, renders impossible any twisting, kinking or tangling of the rope. It is a most desirable article for the farm, prairie, or the plains. We also offer to the trade our extensive line of Covert Harness Snaps, Chain and Rope Goods for sale by all leading Jobbers at Manufacturers' prices.

SEND FOR ILLUSTRATED CATALOGUE and PRICE-LIST.

HARTFORD, CONN.

Non-Mechanical, No-Chimney

LAMPS!

The McLewee Patent.

Burns WITHOUT a Chimney.

NO MACHINERY TO GET OUT OF ORDER.

Absolutely Odorless and Non-Explosive!

Give a larger and brighter flame than can be obtained with a chimney. The combustion is perfect, and they are therefore free from the slightest odor. The globes having large openings at both top and bottom are never broken by the heat. Are superior to all mechanical lamps, in that they require no winding up and have no complicated machinery to get out of order. They are made with both *Single* and *Duplex* Burners.

We have had the light given by the Duplex measured by the U. S. Government Lighthouse Department, and it *gives 50 per cent. more light than either the Mechanical or Student Lamps.*

☞It is unquestionably the Best and Safest Lamp ever made.

PRICES:

Stand Lamp, (Nickel Plated,) Single Burner, Complete, - - - - - - - $4.
Duplex, made in two sizes, - - $5 and $6.
Hanging Lamps from - - - - $3 to $12.

THE HERRINGTON

PATENT

IMPROVED

POTATO DIGGER!

The above Cut represents the HERRINGTON MACHINE FOR DIGGING POTATOES. It will dig where there are heavy vines, and does good work in all kinds of soil, leaving the potatoes on top of the ground, without cutting or bruising, and in good shape for picking up. If it does not perform the work, as above stated, successfully and satisfactorily, no patronage is asked for it. It will tell its own story in a potato-field with a span of horses before it.

It was awarded a diploma from the Western New York Agricultural Society at Rochester, N. Y., September 30th, 1881, for a *successful* machine for digging potatoes; also First Premium at the Fairs of both Rensselaer and Saratoga Counties, N. Y., and "Certificates of Highest Merit" at New York State Fairs of 1882 and 1883.

The following is a description of the machine and its workings:

The frame or enclosure which contains the machinery for operating the digger is hung on the axle of the machine. At the rear end of said enclosure the digger proper is hung at its top centre to a shaft which projects from the enclosure, which has a rapid, short, oscillating motion when in operation, which is driven by a crank, and a sliding-box up near the handle of the machine, which is also enclosed. The vine and weed kickers are driven with a chain belt, as can be seen.

The operator holds the handle of the machine in one hand, the reins in the other.

As the machine hangs flexible the digger can be elevated or lowered at will. When the end of a row of potatoes is reached, the operator hoists the digger out of soil, and at the same time the vine straighteners under the poles are hoisted and held by a spring and ratchet, so that the operator has nothing to do but attend to his team until he gets into position for the next row; then he pulls the cord on top of the handle, which lets the digger and vine straighteners down ready for operation, thus digging every row in succession.

Orders for these machines will be filled in time for the potato harvest of 1884.

PRICE $125.00, for all Orders received before July 1, 1884. FREE ON BOARD CARS IN TROY.

For Further Particulars and Testimonials from Parties who have Machines in Use, Address

PLANTERS' HOE COMPANY, TROY, N. Y.

Amberg's "PEERLESS" Cabinet Letter File

The small cut shows one of the Files or Drawers of a Cabinet. The index in each File has 25 divisions, giving as many spaces or compartments for separating the papers, thereby assuring quick access to any letter when wanted.

OVER 6,000 IN USE.

These Cabinet Letter Files are made in many sizes, ranging from the smallest of six Files to those of one hundred or more. As *lately improved*, they combine all the desirable points wanted in a complete Letter File; are elegantly and substantially made, the wood-work being of the best seasoned Black Walnut, veneered, with fittings of brass and steel, nickel-plated. They can be arranged for any class of correspondence, and adapted to any requirement.

THE BRADSTREET

MERCANTILE ✠ AGENCY

HAS NOW BEEN

Under its present successful management for the past seven years,

And during that time its business has more than trebled, while its facilities have proportionately increased.

No expense is considered too great in obtaining and applying to the conduct of the business all possible improvements. With its present system for obtaining and promulgating information, this Agency is justly regarded by its patrons as authority on all matters affecting commercial credit. Its ramifications are greater and its business larger than any similar organization in the world conducted in one interest and under one management.

You are respectfully invited to investigate, and, if in need of an Agency, to test its ability to serve you.

CHAS. F. CLARK, President.

Baltimore Office,—American Building,

H. KERSHAW, Supt.

THE ECONOMIC PATENT

Boiler Feed Pump

[Patented May, 1879, and February, 1883.]

NOTE.—Every one of our Cold Water Pumps is tested on a lift of 23 feet.

J. B. DAVIS & SON, Makers, Hartford, Conn.

THE ECONOMIC is a double Pump, made in the best manner in all its parts, has intermediate shaft and gears, and is complete in itself, ready to work by attaching the feed pipes to and from it and putting on driving belt.

The four valves, the only parts that can get out of order, are so constructed that they can be got at by simply unscrewing a brass cap. The gears are made from cut iron patterns, rendering them noiseless in action, and, being double-acting, makes it much easier on the driving belt, and its action smoother, and makes it cost, for the same capacity and workmanship, much below any single-acting pump. Especially valuable in sandy or muddy water, as the plain valves can be ground in a few minutes, rendering them perfect as when new.

HOT WATER.—One style is designed expressly to pump hot water.

COLD WATER.—Our cold water Pump has special features over other similar Pumps, which enables it to draft water from 20 to 25 feet, and pump to its full capacity.

☞ Duplicates of all the parts always kept in stock and can be supplied at all times.

THE Pennsylvania Lawn Mower.

We defy any one to Produce its Equal.

We have now in our possession a 16-inch Pennsylvania Mower, which was sold to an institute in this State, and was used nearly every working day constantly from the day it was purchased until we got it in our possession. This Mower cut five hundred acres of grass, was sharpened but once during use, and although it has not been sharpened since it came from the ground, nevertheless will cut the finest paper. We now have it in our store on exhibition, and we only secured it by giving a new machine, the parties not wanting to part with it.

The Quaker City Lawn Mower

This is by no means an inferior Mower because at less list price. The saving in manufacture being because it is a centre cut instead of a rear cut Mower. Particularly adapted for the Southern Trade, and at the price we now offer them parties with the smallest lawns cannot well afford to permit their grass to grow wild, or be ruined by use of grass hook, sickle or scythe.

THE E. M. BIRDSALL COMPANY, AUBURN, N. Y.

Manufacturers of

TRACTION and PORTABLE STEAM ENGINES.

—UNSURPASSED—

FOR

Power, Light Weight, Economy in Fuel and Water, Efficiency, Simplicity and Durability.

The Traction Engines are furnished with Birdsall's Patent Driving Wheel, which is made expressly for soft or muddy roads; they are warranted to travel and take a load on roads that are too soft to be used by any other traction; are very simple; easily managed; better made and made of better material and decidedly the best finished engine in the market. A prize will be given to every farmer who tries them and does not find by experience that they are not excelled by any and superior to most.

THE TRACTION ENGINE.

—UNSURPASSED—

FOR

Power, Light Weight, Economy in Fuel and Water, Efficiency, Simplicity and Durability.

APRON and VIBRATING THRESHING MACHINES, embodying superior points of excellence and merit peculiar to themselves and possessed by none others, are built expressly for heavy work, and have unusually large separating and cleaning capacity; are matchless in strength, beauty of design and finish, and can be operated by any one of ordinary intelligence, owing to their extreme simplicity and solidity; are capable of taking care of all the grain that can be gotten to them, and in a superior manner.

The Novelty Saw Mill is the only mill in the world built on truck wheels, and is gotten up on entirely different principles from any other. The cutting is done with the under side of the saw and with the grain of the wood instead of against the grain as in all other mills, thus saving largely in power required to drive the saw; they are gotten up expressly for light power, and are warranted to run with from ¼ to ⅓ less power than any mill built; a ten-horse engine gives excellent power for them, and will handle the heaviest timber to the best advantage. They can be set up ready for operation while the steam is being raised on the engine; and they will pay the owner on small jobs, owing to their portability, that will not pay on any other mill. They make excellent lumber; are easily managed, and with our Ten-Horse Traction or Portable Engine will cut from 3,000 to 5,000 ft. of lumber per day, according to the size of the logs and skill of the operator.

8 N. Charles St., Baltimore.

CAREW'S PATENT WIRE CUTTER.

These goods have recently been greatly improved. They are now made throughout of

Forged Steel.

The advantage of this cutter is seen at a glance. The adjustable jaws are its main feature. These are made of the best tool steel, and are brought to a keen cutting edge before being tempered. The cutting quality is unsurpassed. Whenever they become dulled by use, they can easily be removed, by driving from the end showing prick-mark, ground, and as easily replaced. This may be repeated as often as expedient; or they can be replaced by duplicate jaws, thus obviating the necessity of purchasing new cutters. **Five sizes—6, 8, 10, 12 and 14 inch.**

ALF'D K. HILLS, M. D., 465 Fifth Avenue. MARY PUTNAM JACOBI, M. D., 110 W. 34th St.

JOHN A. KAMPING, Attorney and Counsel, 128 Broadway, New York.

The Company is incorporated under the Laws of New York, approved by the Supreme Court and Superintendent of the Insurance Department, and subject to the latter's supervision.

ITS OBJECT

is *surely* and *cheaply* to provide an indemnity for loss by death and accidental disablement.

ITS PLAN

consists in assessing the members ratably according to age in the Life Class, and according to occupation or degree of risk in the Accident Class whenever a loss in either class occurs. In other words, the actual losses only are paid by the policy holders, which thus secures *insurance at cost.*

ITS MEMBERSHIP

comprises persons between the ages of 16 and 67, of approved physical condition. The Life Class is separate and distinct from the Accident Class, members being liable for losses only occurring in the class to which they belong. This company, having been organized for the purpose of removing the prejudice which created discrimination in Life Insurance against women, has adopted the broad principle of *no discrimination in membership on account of sex.*

ITS SAFETY AND SECURITY

consists in its economical system, its certainty of solvency, (for it incurs no risk but what the members may discharge by one assessment,) and its SECURITY RESERVE FUND, which in time, it is calculated, will make a member's membership self-sustaining.

ITS RATES OF ASSESSMENT

are safer than those adopted by others, and are no more expensive.

FINALLY,

This company confines itself to the legitimate business for which insurance has been accorded protective and encouraging legislation; it proposes to adhere strictly to business principles in its management, and to establish the fullest protection to its members in a manner the *simplest, cheapest* and *most complete* of any organization of equal safety. Membership may be acquired by letter. Apply to

ELIZABETH S. ROBERTS, Secretary.

283 Fourth Avenue, New York.

This Company requires Agents in every city, town and village, to whom liberal terms will be given. Address as above.

NORRIS COOK, Hendersonville, N. Y., says: "The Machine I ordered from you is at hand. It is all right, and works like a charm. We have tried it in every way in which it can be used and find that it does all that you recommend it to do. It will be worth its cost to me in one year. Our foreman says it is worth $500 to us. I have ordered the agent to forward the balance due you. I shall want your Tenoner for the next machine I buy."

CLARENCE F. LEE, carpenter and builder, Morristown, N. J., says: "I have had one of your Hand Circular Rip-Saws for about three months, and am much pleased with it. Have done the ripping for 15 houses in that time, which is over forty miles through inch boards. Have ripped as high as 3-inch plank. The table is also good for rabbeting; have rabbetted all jambs and sawed all drips for 200 windows." (Descriptive Catalogue and Price-List free.) Address **W. F. and John Barnes, Rockford, Ill., No. 221 Ruby Street.**

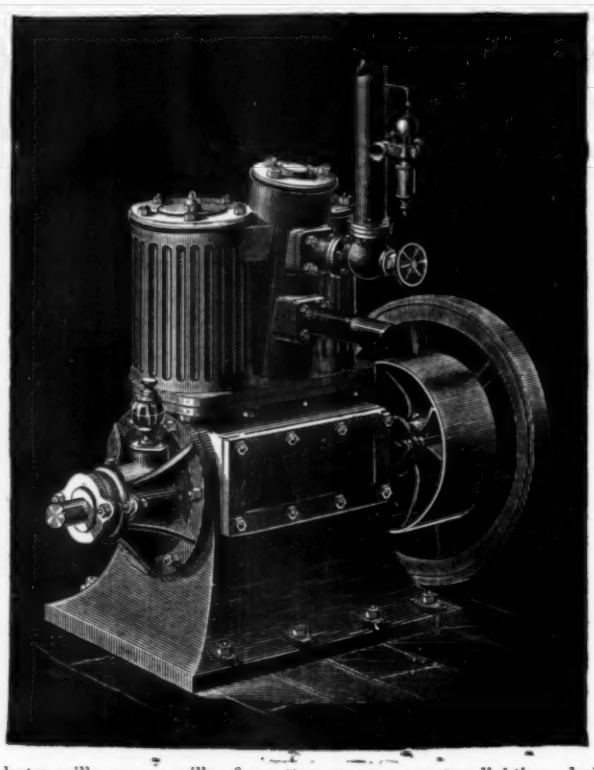
THE Westinghouse Automatic Engine

Over 600 Engines Now in Use. Average Sales, 1,200 H. P. Per Month.

[REAR VIEW, WITH ONE FLY-WHEEL REMOVED.]



The Westinghouse Automatic Engine has no equal in sensitive and close regulation, low cost of maintenance and general convenience; and in all other essential features of a FIRST-CLASS ENGINE it is guaranteed to have no superior.

Occupies the least space and saves half the cost of foundations. All sizes built strictly to gauge and parts interchangeable. Every engine tested to full power before leaving the shop. Our Engines are largely used in cotton, silk, hosiery and woolen factories; paper mills; rolling mills; oil mills; saw and planing mills; grist and roller mills; plaster mills; stamp mills; for cotton ginning; electric lighting; draining and irrigation; and as a relay to deficient water power; also for fast steam yachts and tugs. Especially adapted to coupling direct to line shafts, roll trains, beaters, and all kinds of special machinery. ☞ Send for Illustrated Circular and reference list, and state the horse-power required. ☞ Our prices are moderate.

The Westinghouse Machine Co., Pittsburg, Pa.

Address, if more convenient, our following Branch Offices:

Greenfield Vertical Engines

From 2½ to 30-Horse Power.

COOKE & CO.

22 Cortlandt Street, NEW YORK.

SALES AGENTS AND DEALERS IN
—General—
Machinery AND Supplies.

THESE ENGINES are manufactured with great care, from the best materials, and the workmanship is of the best quality, all the parts being fitted in a thorough and workmanlike manner.

The Steam Joints are scraped and ground to a perfect bearing, thus obviating the annoyance of gum or paper joints.

The Shaft, Piston Rod, Valve Rod, and Cross-head Pin, are made of forged steel. The Cross-head is fitted with composition gibbs, that are adjustable (to take up the wear.) The piston is fitted with spring rings. All the moving parts are evenly balanced, thus assuring steadiness and smooth running.

These engines are finely finished and the parts are made interchangeable. They are all that good work and good material can possibly make them.

The engine is furnished with Boiler on same base when called for.

Always Use the Best!

This Belt is stitched in seams one inch apart before putting on the outside Rubber cover, which is made SEAMLESS and therefore cannot split. For endless Belt it is the ACME of PERFECTION, as the splice cannot separate. First cost somewhat more than the cheap Belts generally sold, but well worth the difference. Send for price-list and samples of Belts.

CHEAPEST in the END!

IMPROVED RADIAL DRILL,

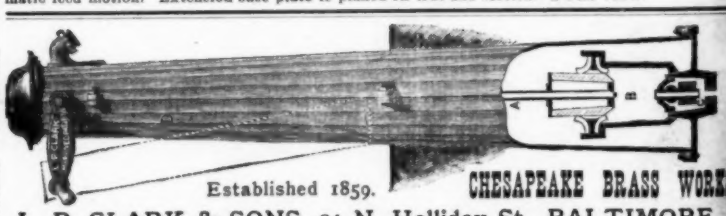
MANUFACTURED BY

HILLES & JONES,

WILMINGTON, DEL.

For Fitting up Steam Engine Cylinders, Steam Chests, Bed Plates, &c.

The radiating-arm traverses freely in all directions, carrying drill, spindle and gearing backward and forward by rack and pinion and hand wheels. The arm can be placed in any position, radiating from column as a center, enabling a large number of holes to be drilled in succession on the same surface without moving the work. Each machine is double back-geared, with automatic feed motion. Extension base plate is planed off true and slotted. **Four** sizes.



Established 1859. **CHESAPEAKE BRASS WORKS.**
